A

GEOGRAPHICAL AND STATISTICAL DISPLAY

OF THE

LOCALITY, RELATION, SUPERFICIES, AND POPULATION

OF EACH

COUNTY, SECTION, DISTRICT, AND COLONY

OF THE

BRITISH EMPIRE;

THE NATURAL INFLUENCE OF EACH, AS INDICATED BY THE

Number of Births and Deaths,

In each Year, through a Period of more than Half a Century, and the Resources and Condition of each, as exemplified in its

PRODUCTION, RENTAL, TAXATION, PAUPERISM, AND CRIME,

WITH A LIKE DISPLAY OF THE

GEOGRAPHICAL POSITION AND RELATION, SUPERFICIES, POPULATION, AND REVENUES OF THE SEVERAL PROVINCES AND DISTRICTS

OF

RUSSIA, PRUSSIA, FRANCE, THE NETHERLANDS, GERMANY, AND THE PENINSULA OF SPAIN AND PORTUGAL,

AND THE

UNITED STATES OF NORTH AMERICA, AND CHINA.

Every line a lesson—every page a history.

"Statesmen and legislators should be men of superior intellectual attainment, and sound education; they should be profoundly versed in history, especially the history of their own country, and more especially that portion of it to which the least attention has hitherto been paid, viz. the condition of the great mass of the Population at different periods; and of the influence of existing laws and institutions in improving or deteriorating that condition: they should be conversant with STATISTICS, familiar with the details of numbers, extent, occupation, &c., of the different Provinces of the British Empire, and of the countries with which she has intercourse, whether commercially or politically: they should be able to select, combine, and arrange all these materials with the master-hand of true philosophers."

SUMMARY of the 82 Pages 9 - 90, shewing the proportion of the POPULATION of GREAT BRITAIN; engaged in, and dependant on, each great branch of PRODUCTION and OCCUPATION.

The first Lord Ellenborough in his place in parliament once stated that there were upwards of 3,000,000 Persons in Great Britain, engaged in, and dependant on the Woolen Manufacture; the Edinburgh Review more recently asserted, that upwards of 1,000,000 Persons were so occupied and dependant; from the Statement below, it will be seen to be doubtful, whether in all its varied operations, more than 250,000 (certainly not 300,000) Persons, are engaged in, or dependant on that branch of industry:—similarly mistaken notions almost universally prevail, in regard to the greater or lesser extent and importance of each great branch of Production and occupation: in a work entitled "*Results of Machinery*," published in 1831, under the superintendance of the Society for the *Diffusion of Useful Knowledge*, it is stated that "in consequence of Machinery having rendered productions of all sorts cheaper, and therefore causing them to be more universally purchased, it has really increased the demand for manual labour," and in support of this assumption, at page 93, it is asserted that "Richard Arkwright, a barber of Preston, invented in 1769, the principal part of the Machinery for spinning Cotton, and by so doing, he gave bread to about two millions† of People, instead of fifty thousand;" and at page 106, in adverting to the Silk Manufacture, it is further asserted that "the higher pride of the present day, is, that we buy three millions and a half pounds of Raw Silk from the Stranger, employ half a million† of our own people in the Manufacture of it, by the aid of Machinery, and sell it to the Stranger, and our own people at a price as low as that of the Calico of half a Century ago. *In refutation of the false assumption and equally false assertion here set forth, the attention of the advocates and friends of truth is directed to the Analysis of occupations below; at the period of* 1769, *and for* 20 *Years subsequent thereto, the habitations of Nos.* 1-2 *and* 4-5, *noted with an* were so many Manufacturing Establishments, earning on an average from* 2/ *to* 6/ *⅌ Week, which earnings supplied the means of domestic comfort and tended to social and moral order;—the introduction of Machinery has concentrated the operation of Spinning with an imposing effect upon the minds of superficial thinkers, but it has annihilated the domestic operation, and deprived from* 1,200,000 *to* 1,500,000 *Families of the means of comfort, and substituted in the habitations of the Farmers, mawkish pretensions for appropriateness of manner; and in the cottages of the Labourer, recklessness of purpose for the social order which heretofore prevailed.—For the immoral effects which have followed the introduction of Machinery and destruction of domestic industry,—see the Statement relating to Crime, which shews a progressive increase from* 4,263 *in* 1806, *to* 19,647, *in* 1831.

* *Nos.* 4 *and* 6, *include a considerable Number of Manufacturers; but Nos.* 13 *and* 17, *on the other hand include probably a greater Number engaged in Mining, than Nos.* 4 *and* 6 *do in Manufacturing.*

The following STATEMENT *shews the progressive increase of the Population in England, Wales, and Scotland, at each of the Six Ten Yearly Periods, since* 1780; *and the annexed Statement shews the estimated proportion of the Population in* 12 *Classes, instead of under three heads only, as exhibited in the return made to Parliament. Notwithstanding, the prevailing notion of Manufacturing, being the predominating interest of Great Britain; by these Analyses of the Population, it is seen, that five-sixths of the Number are dependant on Agriculture for subsistence.*

STATEMENT of the Superficies, in *Statute Acres*, of each County of ENGLAND and WALES, shewing the proportion of each County, in a state of *Tillage*, in *Pasture*, and in *Wood, Unproductive, &c.*. The Rental of each County, according to the Property Tax Returns of 1815, together with the average Rate ℔ Acre of the entire Superficies, the amount of the Parochial Assessments, and of the Land and Assessed Taxes, in each County, in 1829. ☞ *The proportions in a state of Tillage, Pasture, &c., does not profess to be founded on any very accurate data. The Total Superficies of York is 3,815,040 Acres, but the subdivision of the three Ridings is probably not accurate*

COUNTIES arranged in Order of their TOTAL SUPERFICIES, with Number of reference to their Topographical Position.		*Superficies in Statute Acres, deduced from the Trignometical Survey.* ☞ *Proportions in a state of* Tillage	Pasture	Wood, unproductive, &c.	TOTAL Superficies	*Rentals according to Property Tax Return of* 1815.	*Average Rate ℔ Acre on Total Superficies.*	*Parochial Assessments for the Year ending the 25th. of March* 1829.	*Land and Assessed TAXES, in the Year* 1829.

STATEMENT showing the POPULATION of each County of ENGLAND and WALES in 1700, compared with the Number in 1831; and the Number of Houses Assessed to the House Tax in each County, at each of the 5 Periods 1690, 1708, 1781, 1823, and 1830.

*** A Return made to Parliament in the Session of 1822, represented 492,282 Houses only in all GREAT BRITAIN, charged with duty on the Assessed Taxes in the year 1821; but in the Session of 1825, the Chancellor of the Exchequer stated that there were 527,649 persons chargeable to the tax, 171,739 of whom were assessed at Rentals under £10 ℔ annum, which he then proposed to exempt: supposing the Chancellor of the Exchequer's Statement and the Return of 1823 both to be correct, it left 187,981 Houses (including the total number assessed in Scotland) chargeable to the Tax assessed at Rentals of £10 to £20 ℔ annum. According to the Return of 1830, the Number assessed in England and Wales at Rentals of £10 to £20 was 182,424; and 17,915 in Scotland in addition to 17,787 in Scotland at above £20, and 139,806 Farm Houses in all Great Britain occupied by Tenants (exempt.)

STATEMENT of the No. of Savings Banks established in each County of England, and in Wales, between 1815 and Nov. 1830, showing the No. of Depositors; No. of Accounts, Total, and Mean Amount of Deposits, and Ratio of Depositors to every 1,000 of the Population in each County, exhibited in comparison with the Total No. of Families, and of the Total Male Population 20 years of age and upwards; of Male Servants under 20; and of Female Servants of all ages: together with the state of Crime and of Pauperism in each County.

*** The accumulation of Deposits in Savings' Banks, has been assumed as evincing growing prudential habits and increasing comfort and independance of the Working Classes; another Statement will show the fallacy of such a conclusion; and that however unobjectionable such Institutions may be, as affording the means of facile and safe deposit for small sums, if a right application was made of the deposits; and commendable as their economy of detail has been in England; the deposits by being placed in the hands of the Commissioners of the Sinking Fund for investment in the Public Annuity Stocks, have resolved themselves into a National abstraction as completely as though an Invading Force had landed and levied a contribution to the same extent, inasmuch as the amount placed in the hands of the said Commissioners has aided and facilitated the transfer of a corresponding sum from British to Foreign investment.*

	COUNTIES, arranged in order of Total Population in 1831.	Total No. of Families in 1831.	No. of Males in 1831. 20 Years of age and upwards.	No. of Males in 1831. Servants under 20 Years of age.	Female Servants. in 1831.	Number of Banks, 1830.	Number of Depositors in Savings Banks in Nov. 1830. Of Individuals.	Friendly Societies.	Charitable Societies.	Total No. of Account.	Total Amount of Deposits. £	Mean Amount of Deposit. £	Ratio of Depos. to 1000 of Popul.	No. of Committals for Crime. 1805.	1832.	No. of Magistrates. Clergy.	Lay.	Persons employed in Parochial labor in 1831. Roads	all other	Parochial Expenditure for 1831. Maintenance of the POOR. £	all other purposes. £

	Additional in Ireland						45,903	197	431												

STATEMENT showing the *Superficies in Statute Acres, and Rental*, of each County of ENGLAND; the Number of *Persons* returned as dependant on Agriculture in 1801; the Number of *Families* so dependant at each of the three periods, 1811, 1821, and 1831; and the Number of Male Persons at the latter date, 20 Years of age and upwards effectively employed in Agriculture; shewing also the average of Superficies to each occupier, or average extent of the Farms; of Laborers to each occupier; and the proportion of the Total to every 100 acres in each County.

The average extent of the Farms in Col. 12 has been deduced after deducting from Col. 2 an average of 10 acres for each occupier not employing Laborers. In looking at the relative No. of Laborers in each County there are two things to be considered,—Viz., the proportion of unproductive Land, and the greater or lesser extent of Tillage.

COUNTIES arranged in order of their Extent of Superficies.	Superficies in Statute Acres, according to the Trignometrical Survey.	Details of Parishes.	RENTAL, according to Property Tax Returns in 1815. £	Persons returned as employed in Agriculture in 1801.	Families returned as employed in Agriculture. 1811.	1821.	1831.	Male Agriculturalists, 20 years of age, and upwards, in 1831. Occupiers employing Laborers.	Occupiers, not employing Laborers.	Labourers.	Total of the 3 preceding Columns.	Average of Land to each Occupier.	No. of Laborers to each Occupier.	Proportion of Col. 11, to every 100 Acres.	No. of Select Vestries.	No. of Assistant Overseers.

A Comparative View of the Number of Families in each County of England in 1821 and 1831, returned under each of the three usual heads, viz.—1st, Employed in Agriculture; 2nd, in Trade, Manufactures or Handicraft; and 3rd, all others not included in either of the two preceding classes: and also a Statement of the Male Population in each County, 20 Years of Age and upwards in 1831, under each of six several heads of Occupation or Service; the Counties in the first instance arranged in order of their Total Number of Families, whereby the relative proportion of each class in each county is the more readily discernible; and in the other case, the Counties are arranged in reference to their Manufacturing Predominance, and the Manufacturing Male Population placed immediately in comparison with the Agricultural: another Statement exhibits the Retailers and Handicraftsmen in column 11, under each of 120 heads of Occupation or Service in each County, so classed as to show their extent, relation, and importance to each other, and inconsiderableness of the manufacturing operation in its external point of view, when compared with the interesting combination of internal interests.

, *The comparison of the Number of Families in 1821 and 1831, under each of the three usual heads is remarkable for the increase under the third head as exhibited in column 8, and supposing the comparison to be just, the result would be important; but the comparison is not correct: the Miners, which in the previous Returns were in general entered under the second head, in the last Return have all been entered under the third head; and the greatest increase will be seen to prevail in the Mining Counties, numbers of other Occupations or Service, also, which in the previous Returns were entered under the first and second heads, have in the Return of 1831 been entered under the third head, all conclusions therefore, drawn from the total result as here exhibited under, a supposition of the comparison being just, will be fallacious. The absence however, of fair comparison under these three heads, is more than compensated for, by the ample details which the Returns of 1831 contain, as exhibited in this and contiguous pages.*

COUNTIES, arranged in order of their Total Number of Families in 1831.	Total Number of FAMILIES in 1821.	Total Number of FAMILIES in 1831.	Proportion of FAMILIES, Returned as employed in Agriculture. 1821.	Agriculture. 1831.	Trade, Manufactures, or Handicraft. 1821.	Trade, Manufactures, or Handicraft. 1831.	All others, not included in the two preceding. 1821.	All others, not included in the two preceding. 1831.	Male Persons 20 Years of Age and upwards in 1831, engaged in Occupations as under. Capitalists and Professional Men.	Not engaged in any Specific Occupation.	Retailers and Handicraftsmen.	Labourers other than in Agriculture.

The above Statement shews the change that has taken place in the relative importance of the English Counties since 1700, in a more perspicuous point of view, than any in which it has heretofore been exhibited; the increase is seen to preponderate greatly in the Manufacturing and Mining Districts, while the Statement of the Population of the Principal Towns of England and Wales, shews that the increase of the Agricultural Counties is principally in the Towns; so, that the Rural Population of England, as, in the Agricultural Counties of Scotland, appears not materially, if at all, to have increased since 1700. The ratio of increase in the aggregate of the Kingdom in the 10 Years ending with Easter 1831, is less than in the preceding 10 Years, which may be accounted for by the large Number of Soldiers and Seamen, dispersed over the Country between 1815 and 1821, making due allowance for that extraneous excess, during that period, the ratio of increase from 1821 to 1831 is remarkable for its uniformity.

Counties of England, arranged in Order of Ratio of Increase, since 1700; with the Ratio ₩ Ct. of Increase, in each Co. at each of the 4 Ten Yearly Periods 1801 to 1831

STATEMENT shewing the proportion and parts of *SCOTLAND*, engaged in *Manufacturing*, distinct from the *Agricultural and Highland Counties*, with the annual Value of Real Property in each Division; by this Analysis, it is seen, that the increase of Population since 1755, has been wholly concentrated in the Towns and Manufacturing Districts, and that while in the 75 Years, the Total Number has doubled, the *Agricultural Population* has remained stationary. The gregarious tendency, and preponderance of Town Population, which this Statement shews to have prevailed in Scotland, whether considered as a question of general Policy, or of individual advantage, merits the serious regard of a Wise and Paternal Government; the suggestions which the preponderance excite, are too numerous and important to be entered upon here, they will be found adverted to, in the introductory Pages.

*There are two disparities, noted with an * which require explanation; the Number of Families in Dunfermline Burgh in* 1811, *are stated at* 5,001, *the* 5 *should doubtless have been* 2, *it of course alters the Totals and proportions of the Columns to which it applies; The Parish of Govan in the under Ward of Lanark in* 1811, *included a part of the Gorbals of Glasgow, which in* 1821, *was returned under that head, take the* 2 *lines of Under Ward and Glasgow together, and the disparity is reconciled.*

	TOWNS and COUNTIES, arranged in reference to their order of OCCUPATION and PRODUCTION, with Number of reference to their Topographical Arrangement. Geographical Position of each County of Scotland, shewing the Superficies, Live Stock, Annual Value of Property, and Rental of each, &c. &c.

The Statistical part of this Statement, (except the Column shewing the Value of Property in 1815) has been compiled from the Agricultural Report of Scotland. The Rentals of Kinross & Kircudbright are palpably erroneous; in Alphabetical order those two Counties follow each other, it is probable that the Amounts were inadvertently transposed by the Printer, and that Kircudbright should be £ 183,488.

These 13 Counties form the *South Lowlands* of Scotland, and are separated from the Highlands by the Isthmus between the Frith of Forth on the East, and the mouth of the river Clyde on the West. During the possession of Britain by the Romans, that enterprizing people erected a Wall and Chain of Forts across this Isthmus, as a barrier to protect the Lowlands from the incursions of the Picts, and other Inhabitants of the Highlands; since 1767, in a line nearly parallel with that on which the Wall and Forts formerly stood, a Canal has been formed which unites the Waters of the Eastern, with those of the Western Coast,—see Note at foot of page 26. In the "General Report of the Agricultural State of Scotland" published in 1814, the Counties noted with an * are termed Pastoral; those with a § Agricultural; and those with a ‡ Manufacturing.

The Waters of Nos. 1-3 run South into Solway Frith; of 4-6 West, or N. W. into the Frith of Clyde; of 7-11 East into the North Sea; and of 12-13 E. N. E. into the Frith of Forth.

CENTRAL DISTRICT.—The County of Bute, is formed of the Isles of Bute, Arran, & Cambræ, in the Frith of Clyde, see page 26. The North part of Dumbarton, and the Western parts of Stirling and Perth, form the South part of the Highlands: the Waters of Dumbarton and the West part of Stirling fall into the Clyde; those of the East part of Stirling, and of all Perth, fall into the Eastern or North Sea. Clackmannan and Kinross, are insulated Districts in the S. E. part of Perth; and Fife is a Peninsular District, lying between the Friths of Forth and Tay.

NORTH EAST LOWLANDS,—lying between the Tay on the South, and Murray Frith on the North, and bounded on the East by the North Sea. The North and South *Esk*, the *Dee*, the *Don*, the *Vethan*, and *Ugie* rivers, which water Nos. 21-3, run S. E. or E. into the North Sea; and the *Deveron*, the *Spey*, the *Findhorn*, and the *Nairn*, which intersect Nos. 24-6, run N. or N. E. into the Murray Frith, between Kinnaird's Head and Fort George,—see Note at Head of page 44.

Glen-more-na-H'Alabin, or the great *Glen of Caledonia*, in a direction from the head of Murray Frith S. W. to Loch Linne, through which a chain of Lakes have been formed into a Canal for Vessels drawing nearly 20 feet of water, divides the mainland of Inverness into nearly two equal parts,—see Note to Nos. 782, &c., and at head of page 48.

Nos. 28-31 are all North of this Glen, and form another prominent division of Scotland, usually called the *North Highlands*. The County of Argyle is composed of several Peninsular Districts and Islands Westward of Ayr, Dumbarton, and Perth; and forms in itself another prominent Division of the Kingdom; its Islands form the South division of the HEBRIDES, which flank the whole of the West Coast of Scotland, between the Latitude of 55 22 and 58 35 North. The Orkneys and Shetlands are other Clusters of Islands, extending North to the Latitude of 61 15.

STATEMENT shewing the Total Number of BAPTISMS and BURIALS, in each County of *ENGLAND and WALES*, in each of the 7 Years 1798–1804. *** *The Baptisms and Burials for these Years, have been distinctly exhibited in consequence of its appearing to have been one of the most remarkable periods in the History of the Country; a period in which the whole World, either openly or insidiously were in hostile array against Great Britain. Yet, as appears by the General Statement of the Baptisms and Burials, in all England and Wales, after the first effects of the War had subsided, contrary to all received opinion, as to the effects of War upon the progress of Population; England and Wales exhibits an unprecedented increase; the excess of Baptisms over Burials in 1798, considerably exceeding the like excess in any former Year, which progress of increase however was very sensibly checked, by the unprecedented high money price of subsistence in the Years 1800 and 1801: but, the increase since that period is still more remarkable, and the inequalities of the effect of the price of subsistence in those two Years is a feature of the account that deserves particular attention: some of the Counties appear to have felt the effects in 1800, and others not till 1802 and 1803.* †† *The Returns up to 1800, were incomplete, the Numbers affixed to some of the Counties, imply the Number of Parishes, or Chapelries, whose returns were deficient: from those noted with an * they were considered complete;—see Note to General Statement of all England and Wales*

STATEMENT shewing the TOTAL POPULATION in each County of *England and Wales*, as enumerated at each of the Three Periods 1801, 1811, and 1821. The Counties arranged in Order of their Total Population in the latter Year. The Total Number of *Marriages, Baptisms*, and *Burials*, in each County, in each of the Ten Years ending with 1790, 1800, 1810, and 1820. The Ratio of *Marriages*, in each of the 10 Years ending with 1800, 1810, and 1820, to every 1,000 of the Population in each County, as enumerated in each of those Years, and the Ratio of *Baptisms*, and *Burials*, in each County to every 100 *Marriages*, in each of the Ten Years ending with 1790, 1800, 1810, and 1820, together with a Column shewing the rate of increase on every 100 of the Population, in each County, in the Twenty Years ending with 1820.

Counties arranged in Order of their TOTAL POPULATION *in* 1821.	TOTAL POPULATION, *as enumerated at each of the Three Periods*			TOTAL *Number of* MARRIAGES, *in each of the Ten Years ending with*				TOTAL *Number of* BAPTISMS, *in each of the Ten Years ending with*

, The Statement below will be seen to be a continuation of that on the preceding Page, and to contain an exhibition of the progressive change in the procreative and decremental state of the Population of *England and Wales*, in the Forty Years ending with 1820. The Parish Register Returns up to 1800, were more or less defective, those from the Counties only noted with an * in the first Column of the Ratio of *Marriages* being considered complete. The Totals for each of the Ten Years ending with 1790, and 1800, contain 162,233 Baptisms, and 113,454 Burials, more than the details, a Summary of additional Returns to that amount being included in the Totals, this defect in the Returns will be seen to affect the fair comparison of the Numbers in the Counties with one another, but not the *Ratios*, which is the more and most important feature of the account, and one which will be seen to deserve in a very high degree the attention equally of the Statesmen, Physiologists, and Moralists, of all Countries. It has been a generally received opinion that Marshy Countries or districts, are unfavorable to an increase of Population, as well from their tendency to retard or check fecundity, as accelerating Mortality. The Counties of England which wholly or partially come under the denomination of low Countries are Numbers 8, 11, 12, 36, and 41, which Counties will be seen to exhibit the greatest changes both in the increase of Births and decrease of Mortality, but it is a fact worthy of being known to the patriotic and philosophical enquirers of all Countries, that during the period of the important changes which the account below exhibits, the Marshes in the Counties in question have been converted by drainage from dreary and pestilential Wastes, to the most productive tracts in Europ

Counties arranged in order of their TOTAL POPULATION in 1821.	TOTAL Number of BURIALS in each of the Ten Years ending with				Ratio of MARRIAGES, to every 1,000 of the POPULATION, in each of the 10 Yrs.			Ratio of BAPTISMS, to every 100 Marriages, in each of the 10 Years ending with				Ratio of BURIALS, to every 100 Marriages, in each of the 10 Years ending with				Ratio of Marriages, to every 1,000 of the Population, and of Baptisms, and Burials, to every 100 Marriages, in each County of England and Wales.

STATEMENT shewing the Total Number of *Baptisms*, and of *Burials*, in each County of *ENGLAND and WALES*, in each of 14 different Years from 1700, to 1820. The Counties arranged in Order of their TOTAL POPULATION in 1821. *** The Years selected for exhibition have been as follows, Viz. 1700, as the first Year of the Period, and in which the *Baptisms* exceeded the *Burials* by nearly 20,000, whilst in 1710, 1720, and 1730, the *Burials* exceeded the *Baptisms* in the latter Year by upwards of 15,000. In 1740, the *Baptisms* exceeded the *Burials* by only 1,984; In 1750, by 25,498; In 1760, by 31,431; In 1770, by 32,577; In 1780, by 29,826; the four following Years exhibit an increase of 3 to 7,000; and in 1785, the Year of Peace after the American War the excess of *Baptisms* and *Burials* amounted to 51,759.—*see Continuation of Note on following Page.*

*** From 1785, to 1792, the increase was progressive, the excess of Baptisms over Burials in the latter Year having been 78,653. The War declared in February 1793, appears to have diminished the Number of Baptisms, and increased the Burials, so that in 1795, the excess was only 43,890, while the excitements occasioned by the high money prices in 1796 – 8, increased the excess again in 1798, to 81,024,—the next Year exhibited in 1801, which exhibits the greatest change of the whole, occasioned doubtless by the unprecedented high money price of Subsistence in the preceding Year. In 1801, in the Metropolis, and the Counties of Lancaster, Warwick, and Worcester, the Burials will be seen to have exceeded the Baptisms, whilst on the other hand the Agricultural Counties of Norfolk, Lincoln, Suffolk, Cambridge, and Sussex, appear not to have been at all affected by the change, an exception which deserves particular attention, inasmuch as at a later period they appear to be Counties in which the pressure of Parochial burthens have been the most severely felt. The Peace of Amiens in 1802 – 3, appears to have produced the usual effects of a considerable increase of Baptisms, and 1804 exhibits a sensible decrease of Burials, so that the excess of Baptisms over Burials in that Year amounted to 113,315. During the Six following Years the Number of Burials gradually increased, so that the excess of Baptisms over Burials in 1810, was only 90,660. The general Peace in 1815, again produced an increase of Baptisms exceeding 25,000, and the excess of Baptisms over Burials in that Year, will be seen by the aggregate Statement of all England and Wales to have amounted to 147,523, which in 1818, was reduced to 117,760: on comparing these results with the Money Rate of Wages, and price of Subsistence, which will be found in other parts of this Work, they appear to have produced a sensible effect upon the Physical, and Social condition of the People, as far as such evidence warrants any conclusion being drawn on the subject.

STATEMENT of the Total Number of *Marriages, Baptisms, and Burials,* in each of the Five Divisions of the *METROPOLIS* of *GREAT BRITAIN,* in each of Nine Years from 1700 to 1780, and in each of the Forty Years 1781 – 1820

*** *The Topographical exhibition of the Parishes which compose the British Metropolis, will shew the extent of its Population at different Periods, and the direction in which it more particularly inclines to extend, the Numbers in the* City of London *within the Walls, appear to have sensibly diminished, to which diminution, various causes have contributed. The Scite of the New Post Office completed in* 1829, *occupied a space which in* 1801, *contained more than* 1,000 *Inhabitants. The Bank of England, and other Public Buildings, at earlier Periods displaced proportionate Numbers, but the main cause of the seeming diminution of Numbers in this division of the Metropolis arises, from the tendency which has prevailed for many Years past, to desert it as a permanent residence, by which most of the Largest Houses are now used only as Offices for Business during the day.* ☞ *It will be noticed that from* 1801, *there appears a sudden diminution in the* City of London *without the Walls. This arises from the Parishes of* St. John Horsley Down, *and of* St. George, St. Olave, St. Saviour, *and* St. Thomas, *in the Borough of Southwark, up to* 1800 *inclusive, having been included in that division; but subsequent to* 1800, *in the division of Out Parishes, within the Bills of Mortality, which reconciles at the same time the otherways seeming disproportionate increase subsequent to* 1800, *in that division. The relative difference between the Baptisms and Burials in each of these divisions is a feature that deserves attention.*

*** The Statement below shews the aggregate result of the Parish Registers of the METROPOLIS, composed of the five Divisions, as exhibited on the preceding page, and distinguishes the proportion of Males and Females, both Baptised and Buried, and the excess in each Year of Burials over Baptisms, and the converse. *Although in the aggregate of all England and Wales, the Baptisms have considerably exceeded the Burials in each Year since 1740, the excess of Burials over Baptisms in the Metropolis, will be seen to have continued down to 1801, since which Year a striking change has taken place in the relative increase of Baptisms, and decrease of Burials in every part of the Country; it deserves attention that whilst in Lancashire, the West Riding of Yorkshire, and some other parts of the Country, the Burials in 1801, very considerably increased, there was in the Metropolis contrary to what might have been expected a very considerable diminution.*

The Statement of the Total Number of Baptisms and Burials, in all England and Wales, in each of the Seven Years 1798–1804, will shew more clearly the Counties and the Years in which they were affected by the high price of Subsistence in 1800–1, in some it seems to have produced its effect in 1800; in others, in 1801; and in others, not till 1802–3; and in Norfork, and one or two other Counties, but little or no effect appears to have been produced.

Excess of Burials over Baptisms.

Excess of Baptisms over Burials.

‡‡‡ *The Columns below shew the Total Number of Baptisms and Burials in that part of the Metropolis included within the Bills of Mortality, which comprise the first four divisions of the account on the preceding page. The Worshipful Company of Parish Clerks Publish annually, a Bill of Mortality, which is copied in general into all the Newspapers, but as inaccuracy involves no penalty, the details are not deserving of any very great confidence, although one Year with another, they are perhaps tolerably near approximations to correctness.*

☞ *For the Diseases which occasioned the great Mortality in 1762–3, as well as generally,—see Statement of the Mortality of the Metropolis. The Assize of Bread was discontinued in 1815,—see Statement relating to the Importation and Exportation of Grain. The Weight of the Quartern Loaf was* 4 lb. 5 oz. 10 drs.

Years	Marriages according to the Par. Registers	According to the Bills of Mortality: Baptis	According to the Bills of Mortality: Burials	Excess of Burials over Baptisms, and vice versa	Highest and Lowest Price of the Quart. Loaf

Excess of Burials over Baptisms.

Excess of Baptisms over Burials.

STATEMENT shewing the Number of *Marriages, Baptisms, and Burials,* in the Counties of *LANCASTER,* and in the *West Riding of YORKSHIRE,* at Periods of 10 Years from 1700 to 1780, and in each of the 40 Years 1781 – 1820; distinguishing in the Baptisms and Burials the proportion of Males and Females, and the excess of Baptisms over Burials. *** The Population of these 2 Districts in 1820, was as 10¼ in *Lancashire* to 8 in the *West Riding,* whilst the Deaths as indicated by the Burials in the 10 Years 1811 – 20, will be seen to have been in the proportion of 18 in *Lancashire* to little more than 12 in the *West Riding.* This is an additional confirmation to the numerous others shewn in various parts of this Work, of the deleterious effects upon Human life of the Manufacturing operations of *Lancashire,* notwithstanding which, numbers seem to press towards the vortex with accellerating force; and the difference of the Mortality of these 2 Districts from the similarity of their pursuits is remarkable and merits investigation. The results exhibited of the Baptisms and Burials of *Lancashire* prior to 1780, imply its being naturally favorable to health and longevity. The effects of the high Money price of Subsistence in 1800 – 1, appear to have effected *Lancashire* in a far greater degree than any other part of the Kingdom, the result together with the great reaction in the 3 following Years deserves attention. —*see Notes to the other Statements relating to this same subject.*

STATEMENT of the Total Number of *Marriages, Baptisms, and Burials,* in all *ENGLAND and WALES,* at each of nine Ten Yearly Periods from 1700 to 1780, and in each of the Forty Years 1781–1820; shewing the excess of Baptisms over Burials in each Year. *** *In the first Return of Abstracts from the Parish Registers of the Kingdom made to Parliament in* 1801, *much difficulty was experienced in obtaining Returns from several Parishes, but after repeated applications* 280 *Places only remained from whence Returns could not be procured. (Vide Folio* 449, *of the Abstract printed in* 1801.) *and those on enquiry proved to be principally* Chapelries, *whose accounts were probably included in the Returns made from the Registers of their respective Parent Churches, and the Totals of the* 20 *Years* 1801–20, *include the unentered Marriages, Baptisms, and Burials, as well as the Registered, so that the account below may be considered as exhibiting a tolerably near approximation to a correct view of the progressive increase of Numbers since* 1740. *The Years most remarkable for change are noted with* + plus, *or* — minus. *The period* 1710–40, *(comprising the* 27 *Years of Peace which followed the War in the Reign of Anne) seems to have been a period of depopulation. The decrement however appears not to have been general over the whole Country ; in Yorkshire and the Four Northern Counties, as well as in the Counties of Derby, Stafford, Gloucester, Hants, and Sussex, the Baptisms exceeded the Burials ; the parts of the Country in which the Burials more particularly exceeded the Baptisms, were the Metropolis, Wales, and the Counties of Lancaster, Lincoln, Chester, Bedford, Berks, and Somerset.*

*** Assuming, *that those Relieved occasionally, to be the heads of Families, and on an average of 3 Children to each, and including the Non-Parishoners, it makes the proportion of Paupers to the Total Population, about 28 ₩ Cent.*

STATEMENT shewing the Amount of the *Parochial Assessments* in each County of ENGLAND and WALES, in each of the three Years ending Easter 1813, 1814, and 1815; the Rate ℔ £ at which levied; and the Number of Persons relieved out of the Poors Rate, distinguishing the proportion relieved permanently, from those relieved occasionally; and the proportion of those relieved permanently, in Workhouse, from those out of Workhouse in each County;—the Counties arranged in order of their TOTAL POPULATION in 1811, whereby the inequality of the Assessment and Relief is rendered the more readily discernable.

*** This account up to 1821, has been compiled from the Appendix to the Report of the Select Committee on the Poor Laws,— Vide Folio 517. Vol. 5. of Papers, Session 1822, and the remainder from accounts laid before Parliament annually since that time, the average Price of Wheat in this Statement, will be seen to differ from those in the accounts relating to Grain, the reason is that these are made up from the 25th. of March, to the 25th. of March, whilst the others are made up from the 1st. of January, to the 31st. of December, see further,— Summary of Parochial accounts.*

The Number of Children in the County of Middlesex belonging to those permanently *relieved out of Workhouse in* 1802—3, *was* 4,347 *under* 5 *Years of Age; and* 6,690 *from* 5 *to* 14, *and out of the Total Number relieved* 8,407 *were above* 60 *Years of Age, or disabled from labor by permanent illness or other infirmity: of the amount expended for maintenance of the Poor in the same Year,* £ 224,048 *was the proportion for those maintained in Workhouse, being at the rate of* £ 14 14 10 ₩ *head.*

On referring to the Statement of the Assessment and Expenditure of the several out Parishes of the Metropolis, the rate ₩ *head for maintenance of the Poor in Workhouse, in the Year ending Easter* 1803, *will be seen to vary from* £ 6 18 0 *in St. John Wapping, to* £ 41 13 9 *in St. Mary Islington; this disparity (admitting the accounts to be correct) bespeaks extreme insufficiency on one side, or great profusion on the other; but, the probability is, that the disparity arises more from the want of method and competency in making up the accounts than from any actual difference in the scale or cost of subsistence; items which in one case will be charged under one head, will in another case be charged under other heads, precluding all fair comparison, and thereby shewing the desirableness for some uniform mode of account being adopted and enforced into practice, in all the parishes of the Kingdom.*

STATEMENT shewing the amount of Money Expended for the *Relief of the POOR*, in the Cities of LONDON and WESTMINSTER, and in each of the principal Parishes and Districts, within the COUNTY of MIDDLESEX, in the Year ending Easter 1776; annually, on an average of the three Years ending Easter 1785; in the Year ending Easter 1803; and annually, in each of the 17 Years ending Easter, or the 25th. of March 1829.

1831 – 32														

The feature first deserving of attention in the above Statement, is the large amount expended for the relief of the Poor within the Walls of the City of London; which relatively, very considerably exceeds, the amount expended for the like purpose in any other place in England; the Church, Bye Highway Rates, Law Charges, and other local Rates, also exceed in the like proportion, the similar charges in any other place; it is deserving of attention, how far so many small Parishes, might be formed into five, or fewer Divisions for Parochial purposes; Bristol, Norwich, and other places afford precedents, and reference, for the consideration of adopting such a measure: most of the out Parishes exhibit extraordinary increases since 1776; but, the Population of those Parishes, has, since that date increased in corresponding proportions, whilst the City of London within the Walls, has progressively decreased in Population, *(see Note to Statement of the Population of each of the 97 Parishes.)* The operative part of the Silk Manufacture, prevails more particularly in the Parish of St. Matthew, Bethnall Green; and Mile End, Old Town; partially in St. Leonard, Shoreditch; and very partially in the Parish of Hackney: Christ Church, Spitalfields, is the original seat of the Manufacture, and in which many of the principal employers still reside, but the Parish being circumscribed, it precludes any extension of Population, within its limits, and occasions the spreading of the operatives over the adjoining Parishes. For 60 Years previous to 1823, the Rate of Wages for Weaving of Silks in this District had been regulated by legislative enactments, and during the whole of that period, the District exhibited, relatively, less poverty and Parochial burthen, than any other Manufacturing District in the Kingdom; in the Session of Parliament 1823 all those enactmens were repealed, whereby the employees became more directly subjected to the will of the employers,—see the effect, as exemplified above, in the difference of Parochial Expenditure.

☞ *For the Population of each of the out Parishes, see Statement of the Topographical Position thereof.*

STATEMENT shewing the Amount of Money expended for the Relief of the Poor, in each of the 14 Parishes and Districts, forming part of the METROPOLIS; and the Total thereof: and also of the amount in the like manner expended for the same purpose, in each of 15 of the principal Cities and Towns in different parts of the Kingdom, in the Year ending Easter 1776; annually, on an average of the three Years ending Easter 1785; in the Year ending Easter 1803; and annually, in each of the 17 Years ending Easter, or the 25th. March 1829: shewing also the Estimated Value of the Real Property according to the Property Tax Returns of 1815; and the Population of each Parish, District, City, and Town, at each of the 3 Periods 1801, 1811, and 1821.

The following features of this account deserve attention, Viz.; 1st., the inconsiderable amount in Liverpool, being only in the proportion of 1 to 6, as compared with the City of London within the Walls; 2nd. the sudden diminution of Amount in the Town of Sheffield since 1821-2; 3rd. the great fluctuations in Nottingham and Leicester, between 1815 and 1825; 4th. the large amount of Birmingham, as compared either with Sheffield or Manchester; 5th. the Panics of 1816 and 1825 are strongly manifested in Manchester.

STATEMENT shewing the Number of Houses, assessed to the *House and Window Duty*, with the Rental at which the Houses were assessed, in each of 16 Classes, from *l.* 10 to *l.* 400 ℔ annum, and upwards; and the Houses in 10 Classes, having 8 to 180 Windows, and upwards, in each of the Eight Great Metropolitan Divisions, within the County of Middlesex, and the Total of the County, in the Year ending the 5th. of April 1830; shewing also the Total Number assessed in the County of Middlesex, at Rentals of *l.* 20 ℔ annum, and upwards, and having 10 Windows, and upwards, in the Year ending the 5th. of April 1823, and the Rate at which assessed for the House Duty.

*** According to this Statement, the Number of Houses in the County of Middlesex, assessed to the House Tax at Rentals of L20 ℔ annum, and upwards, have increased 12,561, since 1823. In 1821, the Total Number of Houses Inhabited in the County of Middlesex, was returned at 152,969, which in 1831, will probably have increased to 180,000; 495 of which being Farm Houses occupied by Tenants, are *exempt*,—leaving upwards of 63,000 Houses below L10 ℔ annum Rental: The Return of Houses assessed to Window Duty in 1823, was in Six Classes only, as follows, Viz. having from 10 to 14 Windows; 15 to 19; 20 to 29; 30 to 39; 40 to 49; and 50, and upwards; this Classification precludes a fair comparison being made with the Return of 1830; but, as far as inference serves, the Number appears not to have increased.—see following Page, and Note thereto. ☞ *The Figures at the head of the Columns refer to the Number of the Parishes in the Topographical Arrangement of the Metropolis;—see the same, for Value of Property, Population, &c. of each.*

Rate of Duty, in the £.

*** The difference of 1,342 in the Number of Windows, under the head of Inns of Court and Chancery is so many *Chambers* Assessed in those Institutions.

STATEMENT of the Number of Houses, assessed to the *House and Window Duty*, in each of the four remaining Divisions of the METROPOLIS, in the Counties of SURREY, KENT, and ESSEX, and the Total of the Metropolis; shewing also the Number assessed to the like Duties in each of the Counties of Lancaster, Somerset, Gloucester, and Sussex, as containing the greatest proportion of Houses assessed at high Rentals; the Totals exhibited in comparison with the Total in each Class of assessment, in all *England and Wales*, arranged to correspond with the Statement on the preceding Page.

*** *The Total Gross Receipt of the House Duty in all England and Wales, in the Year ending the 5th. of January* 1830, *as credited in the Finance Accounts for that Year, was l.* 1,241,791; *the proportion of the Metropolis as exhibited below, being l.* 770,166, *exceeds* ⅔ *of the whole; it is proper, however, to observe, in regard to this comparison, that the Duty on l.* 11,154,109 *of Rental, in all England and Wales, at the Rates of Duty, as exhibited on the preceding Page amounts to l.* 1,327,940; *whether the difference of l.* 86,149 *arises from arrears, awards on appeals, or from some other cause, cannot here be determined; the difference deserves consideration, in forming an estimate of the proportion between the Metropolis, and all England and Wales: the Rate of Duty on Windows, varies in a way to preclude the forming an estimate of the proceeds of the Duty from the Statement below, but the fair inference is, that the proportion of Amount which the Window Duty in the Metropolis, bears to the Duty in the whole of England and Wales, is about one-third.*

STATEMENT shewing the various Offences, for which the Persons in the preceding Statement were *Committed*, and the proportion against whom *no Bill was found*, the proportion *Acquitted*, and the Number *Convicted*, shewing also the several degrees of Punishment inflicted on those Convicted, and the Number Executed, in each of the 25 Years 1805 – 1829.

*** *These Statements it must be admitted, exhibit a very unfavorable picture of British Society, more especially so when it is considered, that they exhibit only those Criminals who have been committed for Trial at the Assizes; the Numbers Committed under* Summary Process, *exceeding those Committed for Trial at the Assizes, by several thousands annually: nor does the subject appear more favorable when viewed in comparison with the extent of Crime in other Countries, as will be seen by the Statement of following Pages; and when viewed in comparison with the extent of Crime in England from the middle of the last Century as far as the account of the Number of Convictions in London and Middlesex serves for a comparison, the result is fearfully unfavorable; it is somewhat consolatary however to see, that the more atrocious offences against the Person, have not materially increased.*

A Return of the No. of Persons convicted of Forgery, or passing of Forged Notes of the Bank of England, in each of the 33 *Years* 1797–1829, *represents* 1138 *Persons to have been convicted in the* 6 *Years* 1816–1821.— *Vide Par. Paper No.* 442, *Session* 1830: *whilst the Statement below represents only* 767 *to have been convicted in those* 6 *Years in all England and Wales!!!*

The annexed STATEMENT exhibits the *annual aver.* No. of *Capital Convictions* & *Executions*, in LONDON and MIDDLESEX, during the 81 Years 1749 - 1829. The account for the Years 1749 - 1817, was presented to Parliament in the Session of 1818, Vide Vol. XVI, of Papers of that Session;—it was at first considered that the Convictions applied to all who were not either acquited or against whom no Bill was found, but on perceiving the vast disparity between the Total Number of Convictions since 1817, when compared with those of previous Years, it led to a further investigation of the accounts, when it proved, that the Number Convicted comprised those only who were *Sentenced to Death*, termed *Capital Convictions;* and hence, it will be perceived that the annexed account affords no just criterion of the relative extent of *CRIME*, at the different periods in the aggregate; inasmuch as the spirit and temper of the Courts and the Times may have tended considerably to influence the nature of the Sentences; the Number of Executions when relatively considered will be seen to have greatly diminished, but whether as a cause of less atrocity of *CRIME*, or a less sanguinary infliction of Punishment does not appear. For the Years 1811 - 22, of the account below, see Folio 282, Appendix to Report on the Police of the Metropolis, Session 1828; and for the Years 1823 - 9, Folio 7, Par. P4. No. 107, Session 1830: of the Number Committed for all other Offences in 1812, (line 35) 71 were for taking and administering unlawful oaths; 21 for Frame breaking and destroying of Machinery; and 13 for *High Treason:* the Numbers in the same line, in the Years 1828 - 9, arise from a modification of the Law relating to *Burglary*, the Numbers Committed for Burglary, (line 4) shewing a corresponding diminution.

STATEMENT shewing the Amount of the COUNTY RATE, distinguishing the proportion Expended under each of thirteen different Heads, in each County of ENGLAND and WALES, in the Year 1823.—*Vide Parliamentary Paper No.* 356, *Session* 1824.

**** The details of this Account do not exactly correspond with the Totals; in the Official return the details are diffused over 20 folios of Fools Cap, without any regard to uniformity; but as no point is attempted to be established upon the accuracy of detail, it was not thought worth while, in this case, to sacrifice more time in that investigation: the account, as it is, being sufficient to shew the general nature and extent of the* County Rate. *The Cities of Exeter, Canterbury, Lichfield, and Worcester, and the Town of Poole, as well as the Cities and Towns specified below, each keep separate accounts, but the amount was deemed too trifling to insert in detail, the aggregate of the five places being under £ 2,000. The Column of incidents, in some cases below, where the amounts are large, include payments on account of Debt paid off, &c. without being separately specified.*

*COUNTIES, arranged in Alphabetical Order: the Amount noted with an * is for Debt paid off, and those with a † on account of Lunatic Assylums.*	*Building, and Repair of Bridges.*	*Clerks of the PEACE.*	*EXPENCES of* *Coroners*	*Gaols.*	*Houses of Correction.*	*County Hall.*	*Militia.*	*Conveyance of Offenders.*	*Prosecution of Offenders.*	*Vagrants*	*Incidentals.*	*Salary of Treasurer.*	*TOTAL.*

The following is a Statement of the amount of Duties, levied on the Foreign Trade of the Empire, at the Port of Canton, in the Season of 1822—3.

	Imports.	Exports.	
On the Trade of the East India Company	318,332	460,842	1,670,299
Country Trade	195,923	520,833	
American do.	276,578	339,409	980,675
TOTAL. Tales	790,224		

After much deliberation on the several works which have heretofore been published relating to China, the above Statements have been adopted as most entitled to regard, at the same time the above Statements present some such striking discrepancies as to excite a doubt in regard to their accuracy;—for instance, the Province of Shen se, containing seven cities of the first class, and ten of the second class, contributing 1,699,824 Tales of Revenue, and maintaining a Military Force of 104,000 men, is represented as containing only 257,704 inhabitants; while Yun-nan a Province said to be rich in Minerals, Silk, Tea, Musk, and other choice productions, and carrying on an extensive intercourse with Birmah and Siam, is represented as contributing only 243,827 Tales of Revenue. The data relating to Kwei-chou and the Metropolitan Province of Chih-le excite nearly corresponding doubts, yet these data *were submitted to the Committee on the Affairs of the East India Company by Mr. Crawfurd, in the Session of* 1830; *and what is more unpardonable in a gentleman of Mr. Crawfurd's reputation, and general claim to respect, is, that in reference to a Geographical Statement of the travelling distances of the several provincial Capitals from Pekin, he represents the distance of Canton at* 2720 *English Miles, while the Geographical mean distance is only* 1182 *English miles; all the other distances are nearly as preposterous,* - *see page* 51 : *in like manner* Du Halde *represented the Revenues as amounting to* 200,000,000 *Tales, which amount has been adopted as authentic and accurate, by the compilers of the Encyclopædia Brittannica,—so much for names. The competency of Mr. Thoms, from having resided several Years at Macao, and his familiarity with the language of China, qualified him to judge correctly of the accounts which came before him, and the circumstantiality with which he has stated them, leaves but little doubt of their being accurate. The Population Statements however are palpably erroneous, Sir George Staunton's numbers in some cases, seeming as much over rated as Mr. Crawfurd's are under-rated. It is much to be regretted that subjects of this nature should have so long remained questionable.*

The Province of Yun-nan, borders on the Birman Empire, commercial operations extended in that direction would probably be more likely to afford facilities for penetrating China than by its Sea Ports; the Cambodia and Siamese rivers, as well as the Erubatty all appear to flow from Yun-nan,—the exploration of these rivers, with the aid of Steam, would be quite as laudable as exploring of the Niger, and much more likely to reward commercial enterprize.

STATEMENT exhibiting the 19 Provinces of *CHINA*, arranged in reference to their REVENUES and EXPENDITURE, with the ratio of Inhabitants to each square mile; and rate ℔ head of Taxation in each Province; the latter as exhibited by *Mr. Crawfurd* to the Parliamentary Committee on East India affairs in the Session of 1830, and the *Revenues and Expenditures* as exhibited on the preceding page, the Note at the foot of which implies that however questionable the Statements relating to the Population may be, those relating to the Revenues and Expenditures seemed entitled to credit;—but which, on more mature reflection, appear equally unworthy;—it is impossible that the Provinces Nos. 1—9, could continue to contribute such an excess of Revenue as 15 millions of *Tales* annually for any length of time, unless aided by a *Paper Circulating Medium;* and it is also improbable that Nos. 12—17, should continue to draw in specie the amounts represented; in the one case, it would lead to exhaustion, and in the other to an undue accumulation, more particularly so as there does not appear, judging from the relative extent of Population and Productions of the respective Provinces, to be any adequate means of due equalization by Commercial exchange. *** *The Tea Districts are indicated by an *, and the Notations which follow several of the Provinces imply their producing Minerals respectively as follows, Viz.—g Gold, s Silver, c Copper, t Tin, i Iron, l Lead.*

The Province of SHAN-TUNG, is North of the *Yellow River*, bounded on the West by the Metropolitan Province of CHIH-LE, and North by the Gulf of Leaotong; it is an Agricultural district. The *Kiang-keou*, or great River intersects KIANG-NAN,—GAN-HWUY being S. of that River; it is both an Agricultural and a Manufacturing district in Cotton, Silk, & Porcelain. CHI-KEANG, appears to be the most productive Province of the Empire; it produces Silk, as well as fabricating it into Stuffs, and appears to be equally active in Agriculture, Manufactures, and Commerce. SHAN-SE, is bounded on the West for about 250 miles by the *Yellow River*, which separates it from SHEN-SE; East, by the Metropolitan Province of CHIH-LE, and North by Tartary; it abounds in Coal, and Salt-springs, it is a pastoral rather than an Agricultural district, and has Manufactures of Woollens; the *Yellow River* separates it on the South from HO-NAN, which is an Agricultural Province. The *Kiang-keou*, or great River divides HOU-QUANG into two parts. HOO-NAN being on the South; it has numerous Lakes composing several hundred square miles of its Superficies; the bulk of its Population appears to be concentrated on the banks of the great River. KEANG-SE, is South of the great River, bounded on the East by the maritime Province of FOO-KEEN, and South by KWANG-TUNG, its Waters run North into the great Lake of *Poyang*, uniting with the great River in Latitude 30° North.

FOO-KEEN, is a mountainous and mineral district, has Manufactures of Silk and Iron, and contains the Port of Amoy in latitude 24° 20′ North, and 118° 45′ of East longitude. The Population and Revenues of the Island of Formosa are included in this Province. KWANG-TUNG is rich in minerals, and produces both Silk and Sugar. The Island of Hainan in latitude 19° North, and 110° of East longitude is included with this Province. Nos. 12, 13, are both Mineral districts, KWEI-CHOU, is mountainous; part of its Waters flow North into the great River, and part through KWANG-SE into the Harbour of Canton. YUN-NAN, forms the S. W. extremity of the Empire, part of its Waters run S. E. through TONKIN into the Gulf of Tonkin; one of the branches of the great River *Kiang-keou* intersects the N. W., and the main branch for about 50 miles forms the boundary between YUN-NAN and SZE-CHUEN, but its more important features are the *Cambodia*, *Siamese*, and *Erabaty Rivers*, all of which appear to flow from Thibet through YUN-NAN; a junction of these Rivers with the *Kiang-keou* might be effected at about the same cost of time and labor as that of the junction of the Ohio with the great chain of Lakes in America, and thereby open a direct Water communication from the Bay of Bengal with every part of the Chinese Empire; one of the branches of the *Kiang-keou*, having its source in Thibet, in the latitude of 35° North, and 96° of East longitude, runs nearly due South to the latitude of 25° where it is joined by a more important Stream from farther West; from this point it intersects the Province of SZE-CHUEN in a direction N. E. through 10 degrees of longitude, from whence it flows through HOU-QUANG and KIANG-NAN into the Bay of Nankin, in the latitude of 32° North, and 121° of East longitude. SHEN-SE, is the N. W. Province of the Empire; the *Hoang-ho*, or *Yellow River*, having its source in Tartary near the head Waters of the *Kiang-keou*, intersects the extreme N. W. part of SHEN-SE, from whence it makes a detour North to the latitude of 42° and 107° of East longitude; it then runs nearly due East, to the longitude of 112°, from whence it runs South bearing West to the latitude of 34° 30′ North, and 110° of East longitude, forming the boundaries between SHEN-SE and SHAN-SE, No. 5; at the last mentioned point of 34° 30′ of North latitude, &c.; it is joined by the *Hoei-Ho*, another large River with numerous tributary streams, which intersect all the North part of the Province; the Waters of the more Southern part running South into the *Kiang-keou*. From the point of junction just mentioned, the *Yellow River* runs nearly due West, separating CHAN-SE from HO-NAN as stated line 18, and after intersecting the Northern part of HO-NAN, No. 6, it approaches the South part of CHIH-LE, No. 18, and then in the latitude of 34° 40′ N. and longitude of 115° to 117° East, divides the extreme S. W. of SHAN-TUNG from the extreme N. E. of HO-NAN, and then intersects the North part of KEANG-SOO, No. 2, falling into the Bay of Nankin about 180 miles North of the *Kiang keou*, or great River,—see line 58. The Metropolitan Province of CHIH-LE, extends from the *Yellow River* in the latitude of 35° to the latitude of 41° North; its principal River runs North from near the City of HO-NAN to the latitude of 59° North, where it is joined by several other streams from the West and North, when it forms the *Peiho*, or *White River*, falling into the Gulf of Leaotang in the longitude of 118° East. The City of PEKING, is seated between two branches of this River in latitude and longitude as stated at page 51.

The Military and Marine force, specified on the preceding page is not included in the Statement of Population, and in addition to those numbers Chinese Tartary is stated to contain 12,000,000 of Inhabitants, and the Country of the Manchoos 10,000; of the Mongols 30,000; of Bocharia 45,000; and Thibet 6,000. Mr. THOMS further mentions an aquatic tribe amounting to 2,000,000, a considerable number of which inhabit the harbor of Canton; it is this tribe which appears to have given rise to the mistaken notion of the extraordinary density of the Population in China, which in the aggregate is relatively more than one half less than in England; while the Provinces of SHAN-TUNG and CHI-KEANG, as far as reliance can be placed on their Numbers, exceed the density of England by more than 2 to 1.

The aquatic tribes who live exclusively in boats on the Water, appear to have had their origin in a ruthless tyrant driving them from land, and habit becoming engendered among them before they dared to return.

For the overland Commerce of China with Russia,—see *Kiatka*, page 54.

The S. W. point of the *Japanese* Isles is parallel in Latitude with the Bay of Nankin, 8 degrees East of the entrance to the *Hoang-ho* and *Kiang-keou* Rivers. The Japanese Isles extend in a direction N. E. to the Longitude of 143 East, and Latitude 41 North, the large Promontory of the Corea from the Latitude of 35 to 43 North, having the Yellow Sea and Gulf of Leaotong on the W., and the Sea of Japan on the E., lies between the Province of Pecheli, & Niphon the Northern & largest Island of Japan.

STATEMENT shewing the GEOGRAPHICAL POSITION of each of the 55 Governments or Provinces of the *RUSSIAN EMPIRE*, with the Latitude and Longitude of the Capital City, or Chief Town of each, and its distance in Miles from St. Petersburgh; with the mean price of Rye and Oats ℘ *Chetwert* in 1826,—*Vide page* 97. *** *The great Geographical characteristic of European Russia is its evenness of surface, its greatest altitude not exceeding* 1200 *feet above the level of the Sea; it is however in many parts beautifully undulated and abundantly watered, and therefore affords the finest opportunities for social improvement:—no part of the World offers greater inducements to facilitate intercourse either by Water or Railways; the Baltic might be united with both the Black Sea, and the Caspian, at a less expence of Physical power and means than was applied to the subjugation of Poland in* 1830—1831.

Tauridé, *is a Peninsula formed by the Black Sea, and Sea of Asoph; it is better known to Western Europe under the name of the* Crimea. *Keatsch-Jenicol, is on the Western Coast of the Strait leading into the Sea of Asoph. Bessarabia, lies between the mouths of the Pruth, and the Dneister; Akermann, being seated at the Western point of entrance to the latter River.* Cherson, *lies between the Dneister and the Dneiper, and is intersected by the Bog. No. 4, is bounded on the East by the Sea of Asoph, and the Government of the Don-Kosacs, and is intersected by the Dneiper: Podolio, and Kiou, lie between the Dniester and Dneiper, they formed the S. E. part of Poland, annexed to Russia in* 1793. *Pultowa, and Charcoff, lie East of the Dneiper. Volhynia, and Bialostock, are bounded on the West by the Bug, which runs West into the Vistula below Warsaw.*

Lithuania, *is bounded on the West by the Niemen, which divides it from Prussian Poland, and is intersected on the E. by the head Waters of the numerous tributary streams of the Dneiper: Nos.* 14-16, *are also intersected by the main streams of those two Rivers, and are bounded on the East by Russia Proper. Nos.* 17-19, *are Maritime Provinces, bounded on the West by the Baltic Sea and Gulf of Finland. The* Dwina *River rises in Novgorod, No.* 38, *and runs past Witepsk, Potolsk, and Dunniburg, into the Gulf of Riga, the City of that name being at its mouth. Courland, is on the West; and Livonia, East of the Dwina,—the Waters of Coursk, and Voronetje, run South into the Sea of Asoph.*

The Occa, *or* Oka *River rises in Orel and Toula, runs past Catouga and Ruizan into the Volga at Nignei-Novgorod; Jaroslaw, and Costroma, are intersected by the main stream of the* Volga, *which rises in Twer, and after running a very circuitous course past Jaroslau, Costroma, & Nijnei-Novgorod, it runs past Cazan, Simbirsk, Saratov, and Tsaryisyn, into the North part of the Caspian Sea, where it forms an extensive Delta, on one of the Islands of which is seated the City of Astracan. The City of* Moscow, *the ancient Capital of Russia, is seated on the banks of a stream of the same name, or* Moskwa, *which falls into the Occa, between Calouga and Riazan.*

The Dneiper, *has its source in the Government of Smolensk and runs South past Mohileff, and Kiou to Jecatrinoslau, and from thence into the Black Sea at Kherson,* 120 *miles East of Odessa. The Waters of Pskov, all run North to the Gulf of Finland, partly through Lake Tchude, and partly through Novgorod into Lake Ladoga, both of which Lakes discharge their Waters into the Gulf of Finland. The Waters of the Eastern part of Novgorod run South into the Wolga, those of Olonetz and Vologda North, into the White, or Sea of Archangel; and those of Viatka and Perm, run South into the Volga.*

Finland, *No.* 35, *was a conquest from the Swedes in* 1812, *it is bounded on the South, by the Gulf of Finland; and on the West, by the Gulf of Bothnia.*

The Waters of Tambov and Penza, run in both directions partly East into the Volga, and partly South into the Don, one of the branches of the latter River rises in Toula, and another in Tambov, uniting at Voroneje, from whence it runs in a direction S. E. to near Zaritszyn, No. 46, *on the Volga, when it takes a direction due West into the Sea of Asoph at Nova-Tcherkask,—see No.* 48.

The Oural, *or Ural Mountains, form the Eastern boundary of the Governments of Archangel and Vologda, and afterwards intersect those of Perm and Orenburg. The Waters of the Eastern part of Orenburg, run East into the Obe at Tobolsk; numerous other streams unite at* Oufa, *and from thence run West into the Volga below Cazan, while the* Oural *River, forms the Eastern boundary from Verkhouralsk to Orskaia, from whence it runs due West past Orenburg to Ouralsk in Caucassia, from whence it runs again due South into the Caspian Sea at Gouriev, forming in the whole of its course the boundary between Orenburg and Caucassia on the West, and the territory of the Kirghees on the East.*

The Waters of Siberia; *the* Obe, Jenicea, *and the* Lena, *all run North into the Arctic Ocean.* KIATKA, *No.* 54, *on the Frontiers of Chinese Tartary, about* 1100 *miles N.W. of Peking, is the place where an extensive intercourse is carried on between the Empires of Russia and China, about* 2,500,000 lbs. *of Tea, with a variety of other choise products are annually conveyed from the centre of China through Kiatka to Moskow and St. Petersburgh, a distance of from* 4,000 *to* 5,000 *miles.*

INTRODUCTION

TO THE

Geographical and Statistical Display

OF THE

THIRTY-THREE FORMER PROVINCES, AND EIGHTY-SIX PRESENT DEPARTMENTS OF

FRANCE.

The contiguity of France to Great Britain, the similarity of pursuit of its inhabitants, and the superior natural and local advantages which France possesses, renders an accurate knowledge of its resources and power an object of the highest importance to the British Legislator; the accompanying display, therefore, of the local position, and relation of each of its eighty-six present Departments, and Statistical view of the Superficies, Population, Production, and Revenues of each, it is hoped, will be appreciated as a suitable part of the present Collection of Statistical Details.

France, from North to South, extends in nearly a meridional line from *Dunkirk* in the Department of Nord (No. 1.) in the Lat. of 51° 2′ N. to the village of *Peats-de-mello*, at the foot of the Eastern Pyrénées (No. 56), in the Lat. of 42° 25′ N.; this line gives a mean distance of 517 Geographical, or 599 British Statute miles. The Naval Arsenal of *Brest*, in the Department of Finisterre, No. 23, is in Long. 4° 29′ W., and 48° 23′ of North Lat.; and *Strasburgh*, in the Department of the Lower Rhine, No. 61, is in Long. 7° 45′ E., and 48° 35′ of N. Lat.; the distance between these two points is 12° 14′ deg. of Long., which, in the mean Latitude of 48° 29′, are equal to 568 British Statute miles; a line exceeding this by about forty miles, may be drawn from West to East, within the present limits of France. From Point du Ras, twenty-eight miles South of Brest, to the extreme North East limit, forty-five miles North-by-East of Strasburgh; the mean extent, however, from North to South, does not exceed 470, and from West to East 420 British statute miles; these limits give an aggregate superficies of 197,400 square miles, equal to 126,336,000 British statute acres, exceeding the superficies of Great Britain, in the proportion of more than 2 to 1, and England and Wales in the proportion of more than 3 to 1. A report made to the French Government in 1817, computed the superfices to be equal to 128,000,000 of British statute acres, of which about 36,000,000 were reported to be unproductive.

In addition to all the products common to the soil of Great Britain; the Vine and the Olive flourish over the greater part of France, the departments noted with an * in the South East produce silk to the extent of 8 to 10 millions of lbs. in *Cocons*, while the Islands of Guadaloupe and Martinique, afford a liberal supply of Tropical Productions. The five great rivers, the *Rhone*, the *Garonne*, the *Loire*, the *Seine*, and the *Meuse*, afford the finest possible scope for display in internal navigation, independent of the Rhine and Moselle, which still further augment the advantages. The great seats of manufacture, are Rouen, Lisle, and Lyons, in departments Nos. 1, 14, and 69. The chief Ports of entry for Foreign productions, are Havre, Nantes, Bordeaux, and Marseilles, in departments Nos. 14, 24, 49, and 76. The great Naval stations are Cherbourg, Brest, and Toulon, in departments Nos. 19, 23, and 75. The following detailed display of the several Rivers, will suffice to show more particularly the relation of the several departments to each other.

The *Scheldt* and the *Lys* have their source in the Department of Nord, the former runs past Valenciennes, Tournay, and Oudenarde, to Ghent, where it is joined by the Lys, from Lisle and Courtray; the United Stream then runs past Dendermonde to Antwerp. The *Somme*, which gives name to No. 3, runs past Amiens, and Abbeville, into the English Channel at St. Valery. No. 4 was partly in Picardy, and partly in the Isle of France, in which Province was part of No. 12; and part of 13 in Burgundy.

The rivers *Oise*, *Aisne*, *Marne*, *Aube*, *Seine*, and the *Yonne*, all intersect the Isle of France; the *Oise* rises in the Forest of Ardennes, and runs past Guise, Chauny, and Noyon, to Compeigne, where it is joined by the Aisne from the Department of the Meuse; past Grand Pre, Rethel, and Soissons: and from Compeigne, to the Seine at Pont-Oise, [a] about twenty miles below Paris. The *Marne* rises near Langres in No. 11, and runs past Chaumont, Joinville, St. Dizier, Vitry, Chalons, Epernay, Chatcau-Thierry, and Meaux, to the Seine at Charenton.[b] The *Seine* has its source in the Cote d'Or, No. 66, and runs past Chatillon, Bar, and Troyes, to Nojent, where it is joined by the *Aube*; below Nojent it is joined by the *Yonne* from the Department of the Nievre; the United Stream then runs past Fontainbleau, Melun, and Corbeil, where it is joined by other tributary Streams from Loiret. No. 20; it then joins the Marne,[b] about four miles above Paris, through which City it flows to St. Denis, and St. Germain, to below Pontoise, where it is joined by the Oise, [a] from thence past Mantes, and Andelys, to Pont de l'Arche, where it is joined by the *Eure* from No. 16; and from thence past Rouen and Caudebac into the English Channel at Havre, in No. 14; which department is North of the River, the remainder of Normandy being on the South. Nos. 17, 18, are watered by the *Orne*, which falls into the mouth of the Seine below Caen. The small Province of Perche is now comprised in parts of Nos. 16, 17.

Nos. 21—23, are a promontary extending into the Atlantic Ocean, and form the extreme Western limit of France. Nos. 24 to 40, with the exception of 37, [c] are all watered by the Maine, and tributary streams of the *Loire*; the main branch has its source on the border of 78, and runs North, past Le Puy, Monistrel, Feurs, Roanne, Deuze, and Nevers, below which it is joined by the *Allier*, which has run parallel with the Loire the whole of its course; from Nevers the United Stream still runs North to Gien, when it takes a N. W. course to Orleans, and from thence West past Beaugency, Blois, and Amboise, to Tours, where it is joined by the *Cher*, from the South: from Tours it still runs West past Lanjeais, and Saumur, to below Angers, where it receives the *Sarthe* and *Mayenne*, from the North; and from thence, after passing St. Florent and Nantes, it falls into the Atlantic Ocean. Nos. 24, 25, and 28—31, are all intersected by, and Nos. 32—43 are all South of, the main Stream of the Loire.

No. 44 is a maritime District, intersected by the *Charente*, which rises in No. 40, and runs past Angouleme, Cognac, and Saintes, into the Bay of Biscay at Rochefort. The Isles of Re, and Oberon, are included in this department, which is bounded on the S. W. by the Gironde.

Nos. 45—51, are intersected by the Dordogne, the Lot, the Tarn, and the Garonne, and their numerous tributary Streams. The *Garonne* has its source at the foot of the Pyrenees, and runs past Toulouse, to Castell-Saragin, and Moissac, where it is joined by the *Tarn*; from thence past Valence, and Agen, to Tonnien, where it is further augmented by the *Lot*, and from thence past Marmande, Reolle, and Bourdeaux; below which it is joined by the *Dordogne* at Bourg, where the United Waters form the *Gironde* for about 55 miles, into the Bay of Biscay. The *Dordogne* has its source in No. 37, [c] and the *Lot* and the *Tarn* in No. 79. [d] Nos. 54, 55, are watered [d] by the *Adour*, and its numerous tributary streams, which fall into the Bay [e] of Biscay at Bayonne. Nos. 51, 52, 55, 56, and 85, are all bounded on the South by the Pyrenees. No. 50 is a small department, formed out of a part of the three Provinces of Guienne, Gascoigne, and Languedoc.

The rivers *Meuse* and *Moselle*, which water the former Province of Lorraine run North; they both have their source in the Department of the Vosges, the former runs past Vaucoulers, Commercy, St. Mihel, and Verdun, into Ardennes; in which it runs past Sedan, Mezieres, and Charleville, to Givet, where it enters the Netherlands, running past Dinant, Namur, Liege, Maestricht, and Groningen, into the Delta of the Rhine at Rotterdam; one of the branches of the *Moselle* [e] rises in No. 63, and runs past Darnay, Toul, Nancy, Metz, and Thionville, into Luxembourg, past Treves, into the Rhine opposite to Coblentz. Nos. 61, 62, are bounded on the East by the Rhine, which separates them from Baden, they form the extreme Eastern limits of France, as No. 30 does the extreme West.

The waters of Nos. 63—82, except 79, [d] all run South into the Mediter- [d] ranean. The Saone as well as the Moselle, [e] has its source in No. 63, and [e] runs past Gray, and Auxonne, to Chalons, above which it is joined by the *Doubs* from Besancon; from Chalons it runs past Macon, Ville Franche, and Trevoux, to Lyons, where it is joined by the *Rhone* from the Lake of Geneva; from Lyons, the United Stream, under the name of the *Rhone*, runs past Vienne and Tournon, below which it is joined by the *Isere*, from Mont Blanc, past Grenoble, St. Marcellin, and Romans; from the junction of the *Isére* it flows past Valence, Montelimart, Viviers, and le Pont St. Esprit, to Avignon, where it is joined by the *Durance*, from Embrun in the Upper Alps; from Avignon it runs between Beaucaire and Tarascon, to Arles, where it divides into two branches, falling into the Mediterranean about thirty miles West of Marseilles, and twenty East of Montpelier. Nos. 64, 65, 68, 71—76, and 81, are all East of the Saone and Rhone. The waters of Tarn and Arriege, run West into the Garonne, and those of Aude, East, into the Mediterranean.

From the preceding display of the courses of the several Rivers, it appears that in the South of France, Cantal and Correze possess the greatest elevation West of the Alps: a mountain range which gives name to the Department of *Cantal*, has an elevation of 5900 feet above the level of the Sea. In the North-East Nos. 11, 60, 63, and 66, which are contiguous departments discharge their waters both West, and North; as well as to the East, and South.

GEOGRAPHICAL DISPLAY of the 33 former Provinces, and 86 present Departments of *FRANCE;* shewing the Number of subdivisions in Arrondisements, Cantons, and Communes; and Population in 1823 of each Department: and also the distance and bearing in French Leagues from Paris, of the Chief Town of each Department, with the Population thereof in 1823 and 1828.

GEOGRAPHICAL RELATION.	PROVINCES prior to 1789.	DEPARTMENTS in 1833.		Arrondissements.	Cantons.	Communes.	Population in 1823.	CHIEF TOWN.	Distance and Bearing of Chief Town in Leagues from PARIS.	POPULATION of Chief Town, in 1823.	1828.
North.—Nos. 1 and 8, border on the Netherlands.—Nos. 2, 3, 14, 18, and 19, are bounded on the West by the English Channel; the remaining 13 departments are interior. —No. 8, is rich in Coal, Iron, and Slate: intersected by the Meuse running North into the Rhine, and the Aisne, running West into the Seine. The rivers of Champagne all run West into the Seine. The Port of CALAIS, in No. 2, the chief Port of entrance into France from England, is in Lat. 50 57 North, and 1 51 of E. Longitude, being 2 miles South, and 22 East of Dover, giving a mean distance of 22 Geographical, or 26 English Statute miles; Paris being in Lat. 48 50 North, and 2 20 of East Longitude, the mean distance from Calais is 128 Geographical, or 149 English Statute Miles.—The road distance by Boulogne, Abbeville, and Beauvais, is 22 Posts, or 65 road Leagues of 2000 Toises,—the Toise being equal to 6 395 English Feet, makes the distance in English Statute miles 178. By St. Omer, Aire, Boulogne, and Amiens the distance is 24 Posts, or 69 leagues, equal to 159 English Statute Miles.	1 *Artois and* 2 *Picardy.*	1 Nord	7	60	660	905,764	Lille	58 N. N. 		24 Lower Loire	5	45	209	433,845	Nantes	95 W. S. W.	68,427	71,990
These five Departments are all interior, but being intersected by the *Loire,* they are extensively concerned in Boat Navigation.	8 *Anjou.*	25 Maine and Loire	5	34	385	442,859	Angers	73 do.	29,873	29,978
	9 *Maine.*	26 Mayenne	3	27	288	343,849	Laval	70 do.	15,733	15,840
		27 Sarthe	4	32	413	428,432	Le Mans	50 do.	18,881	19,477
	10 *Touraine.*	28 Indre and Loire	3	21	341	282,372	Tours	58 S. W. by S.	21,928	20,920
		29 Loire and Cher	3	21	309	227,527	Blois	43 S. S. W.	15,147	11,337
	11 *Orleannois.*	30 Loiret	4	31	363	291,391	Orleans	29 S. by W.	40,233	40,340
	12 *Nivernois.*	31 Niévre	4	25	330	257,990	Nevers	58 S. by E.	12,289	15,782
	13 *Berri.*	32 Cher	3	29	307	239,561	Bourges	54 S.	18,910	19,500
		33 Indre	4	23	275	230,373	Chateauroux	65 S. by W.	10,129	11,010
There are all interior Departments: *Cantal,* is the most elevated part of France, its Waters fall partly into the Garonne, and partly into the Loire.	11 *Bourbonnois*	34 Allier	4	26	350	280,025	Moulins	72 do.	13,853	14,525
	15 *Auvergne.*	35 Puy-du-Dôme	5	50	438	553,110	Clermont Ferr	97 do.	30,010	30,010
		36 Cantal	4	22	272	252,100	Aurillac	137 S.	9,196	9,576
	16 *Limousin.*	37 Corrèze	3	29	291	273,118	Tolles	120 S. by W.	8,097	8,479
		38 Upper Vienne	4	27	223	274,170	Limoges	97 do.	21,992	23,012
	17 *Lamarche.*	39 Creuse	4	25	296	248,785	Guéret	86 do.	4,014	3,418
	18 *Angoumois.*	40 Charente	5	29	455	347,541	Angouleme	119 S. S. W.	15,025	15,306
South West Departments. Nos. 43, 44, 49, and 54, are bounded on the West by the Bay of Biscay. Nos. 51, 52, 53–5, and 85 are all bounded by the Pyrénées. No. 45 is intersected both by the Lot and the Tarn. The Waters of Nos. 38 and 41 run North into the Loire. BORDEAUX, No. 49, on the West bank of the Garonne, is in Lat. 44 50 N., and 0 35 of W. Long., a mean distance from Paris of 311 English Statute miles. The Cordouan Lighthouse at the mouth of the river is in 45 35 of N. Lat., and 1 11 of W. Longitude, a mean distance from Bordeaux of 55 English Statute Miles. No. 55 is bounded on the West by the Bay of Biscay, and No. 56 on the East by the Mediterranean. *Eastern Departments.* Nos. 57–8, are bounded on the North by Luxembourg. Nos. 61–2 on the East by the Rhine. The Waters of 57–62 and 70, all run North: those of No. 67, partly into the Loire, and partly into the Rhone; the remainder wholly into the Rhone. Nos. 64–5, and 8, border on Switzerland: No. 71 on Savoy: 73–4 on Piedmont and Nice: and 75–6 on the Mediterranean. Dauphine and Provence, and No. 81 are wholly East of the Rhone. The Cote D'Or produces the choicest Wines in all France, they are chiefly consumed in Paris. TOULON, in the Department of Var, is in Lat. 43 7 N., & 5 57 of E. Long., a mean distance from Paris of 309 Geographical, or 358 English Statute Miles.	19 *Poitou.*	41 Vienne	5	31	346	260,697	Poitiers	88 S. W. by S.	21,315	21,562
		42 Deux Sèvres	4	31	363	279,845	Niort	108 S. W.	15,500	15,799

The Notations in Column No. 6 imply as follows, Viz.—l, signifies that the Produce is chiefly Legumes (Pease and Beans ;) b, Sarrazin or Buck Wheat ; m, Mais or Indian Corn ; where blank the quantity is composed of a portion of each,—the following are the estimated proportions of each kind. Viz.—of Mais or Indian Corn 6,302,615 Hectolitres, valued at 12 francs ℔ Hectolitre, 8,409,473 of Sarrazin at 6 francs, 1,798,615 of Legumes at 18 francs, and 1,103,177 de menus Grains ; Tares, &c. at 6 francs. The Horned Cattle are estimated in the following proportions, Viz.—214,131 Bulls at 100 francs each, 1,701,740 Oxen at 200 francs, Cows 3,909,959 at 70 francs, Heifers 856,122 at 50 francs, 291,020 Calves at 60 francs. The Sheep are estimated as producing an average of a Kilogramme *of Wool each, and to consist of 766,510 Pure Merinos valued at 30 francs each, 3,578,748 Cross-breed at 12 francs each, and 30,843,852 indigenous at 5 francs each. The annexed is the estimated Total Annual Value of the Arable produce of the Soil.*

The Hectare *is equal to 2 .47 . English Acres ; the* Hectolitre *to 2 .725 English Imperial Bushels ; and the* Kilogramme *to 2 .205 lbs. Avoirdupois. The 8 Departments noted with an * Nos. 24, 29, 30, 32, 34, 41, 60, and 64, are productive in Silk. The annexed is a Statement of the Weight of* Cocons *in Kilogrammes, produced in each of the 5 Years 1808—12, since when, more particularly since 1825, the quantity is said to be very considerably on the increase.*

The Number of Marriages in the City of PARIS in 1824 *&* 1830 *were as follows, Viz.*

(*Years*	1824.	1830.
Bachelors to Maidens	6,652	6,341
do. to Widows	363	383
Widowers to Maidens	716	729
do. to Widows	239	169
TOTALS.	7,620	7,324

The Number of Natural Children born in *FRANCE*, is a feature deserving of attention, it is important, however, to bear in mind, that in France there is no Local Provision as in England for the Poor; their necessities are however met by Hospitals on an extensive scale in most of the small and large Towns, where Females are received to give Birth to their Children, and when unable to support them, leave them in charge of the Hospital that gave them Birth, the Children so left when born of Married Parents are termed *abandoned*, as distinguished in the annexed Statement of the Births of the City of Paris.

The limited proportion of Births over Deaths which the Total of France exhibits in comparison with the other Countries of Western Europe is remarkable, more particularly so, when the superior local advantages and resources of France are considered. The pressure of the Direct Taxes is such as seemingly to counteract social improvement.

STATEMENT of the Number of BIRTHS and DEATHS, in the *City of PARIS*, in each of the 2 Years 1824 and 1830.

		Males.	Femls.	1824.	1830.

The Number of Sheep in the above 41 Departments in 1812, amounted to 8,406,861: of which 27,593 were *Merinos*, and 99,395 Cross Breed; the Number of Horses in the same Year was 938,000: and the Number Foaled annually 76,000: and the Quantity in *Hectolitres* of all sorts of Grain produced in each of the 3 Years 1810 – 12, was as follows, Viz. –

In 1810, 64,852,171 Hectolitres.
In 1811, 62,681,297 do.
In 1812, 70,311,171 do.

The annexed is a Statement of the Quantity of *IRON*, produced in 1811, in each of 7 Departments: Mont Tonnere, No. 26 had also 4 Furnaces, and 15 Establishments for the Manufact. of Iron, to the extent of 10,890 Quintals.

DEPARTMENTS, producing Iron.	Number of Furnaces	Manufactories of Iron.	Produce in Metrical Quintals: Rough	Produce in Metrical Quintals: Manufact.	Number of Workmen	Money Value in Francs

STATEMENT of the *Geographical Position*, of each of the 40 *Kingdoms, Provinces, Principalities, &c., &c.*, of the Peninsula of *SPAIN and PORTUGAL;* shewing the SUPERFICIES and POPULATION of each; increase ☞ Cent. of Population since the close of the last Century; and Ratio of Population ☞ Square Mile, in 1825. *** The Population of the Peninsula at the close of the last Century as exhibited below, has been taken from a work published in Paris during the occupation of Spain by the French in 1810; and the Numbers in 1825, have been taken from another Work recently Published in that City; other authorities represent the Population of Spain at the *commencement* of the last Century, at about 7,000,000: the increase since 1799, supposing the Numbers as stated below to be accurate, is remarkable; more particularly so, under the circumstances in which the Country during that period has been involved. The extreme Latitudes of the *Peninsula* are, from Cape Ortegal in Gallicia, in 43. 47 North, to *Gibraltar* in Andalusia in 36. 7 North: being a mean distance between those two Points of 533 English Statute Miles; but, as the South parts of Andalusia and Granada form a Promontary the average extent of the Peninsula from North to South will not exceed more than about 475 miles: the extremes of Longitude are, from the Rock, in 9. 35 West, 25 miles West of Lisbon; to Cape Rosas in Catalonia, in 3. 5 East, being a Total of 12 Degrees, 40 of Longitude, or 665 English Statute Miles; (the degree of Longitude between 37 and 43 of Latitude being 45½ Geographical, or 52½ English Statute Miles) but the average extent of *Longitude* will not exceed 10 Degrees, or about 525 English Statute Miles; these averages give a Total Superficies of 249,375 English Statute Miles, which corresponds, or nearly so, with the detailed Superficies below, supposing them intended as Geographical Miles.

STATEMENT shewing the Geographical Position of each of the 42 Provinces of the Kingdom of *SWEDEN and NORWAY;* the Superficies of each, in Swedish Square Miles, distinguishing the proportion of Lakes and Morasses; the Number of Towns, in each Province; the Population thereof, in 1820; the Ratio of Population to each Square Mile; and the annual Value of the Produce of all the Mines, in each Province of Sweden.

*** The Total of Lakes and Morasses includes the Superficies of Lakes Wenern 47. 93, Wettern 17. 10, Malarn 12. 16, and Hjelmarn 4. 25, together 81. 44 Swedish Square Miles. The Swedish Mile contains 11,700 English Yards, being as 1 Swedish, to 6. 65 English, the Swedish Square Mile, is therefore equal to 44. 2 English, which makes the Total Superficies of Sweden, equal to 161,398 English Square Miles.*

MALES.

FEMALES.

STATEMENT shewing the Agricultural Population; and the Number of *Laplanders, Poor, and Prisoners*, distinguishing Males from Females, in each of the 24 Provinces of *SWEDEN*, in 1820: the division of Females also exhibits the Total Number of Families in each Province, under four heads, according to their circumstances or condition; The Provinces arranged in order of their Total of Agricultural Population, with Number of reference in the division of Males to their extent of Superficies; and in the Female division to their extent of Agricultural Produce.

*** *Circumstantial as is the analysis of the Population in Pages* 68 — 69, *it here shews itself imperfect; inasmuch, as after all, it does not shew the proportion of the* 351,064 *Servant Maids & Girls which belong to the Agricultural Class and the Statement below, is, for the like reason imperfect, and accounts for the otherwise seeming excess of Males over Females.*

MALES.

STATEMENT shewing the Quantity of each kind of GRAIN, annually required for Seed, and the produce thereof; and also the Number of *Horses, Horned Cattle, Sheep, Swine, and Goats*, in each of the 24 Provinces of *SWEDEN*.

, The limited return of Produce, especially of Oats deserves attention, and seems to imply, notwithstanding the Latitude of Sweden, that its Agriculture is susceptible of great improvement; it is probable that too great a predilection for Mining and Manufactures, diverts both Capital and energy from the more sober and legitimate pursuit of Agriculture, a subject well deserving the consideration of the present enlightened Sovereign of Sweden, more particularly so, as Agricultural Productions form no inconsiderable Item, in its list of Imports.

Quantity (in Swedish Barrels) of Grain and Potatoes, annually required for Seed.

PROVINCES, arranged in Order of their Produce of GRAIN.	Hvete *Wheat*	Råg *Rye*	Korn *Barley*	Hafra *Oats*	Blandsäd *Mixed*	Arter *Pease*	Spannemål Summa	Potatis *Potatoes*

STATEMENT shewing the MORTALITY, in each of the 24 Provinces of *SWEDEN*, and in the City of STOCKHOLM, in the Year 1820; shewing the various *Diseases* under which the Mortality ensued, and distinguishing the Number of Males from the Number of Females; the Provinces arranged in Order of their Total Population. ☞ *The Column of Totals includes* 30 *Males and* 7 *Females Murdered;* 117 *Male and* 21 *Female Suicides; and* 14 *Males and* 3 *Females Executed.*

*** *On comparing this Statement with the London Bills of Mortality, one feature which it presents unfavorable to Sweden, is the Number of Females reported to have died in* Child-bed, *which are as* 3 *in Sweden, to* 2 *within the London Bills of Mortality; The Number* (1838) *of Illegitimate Children dying under a Year Old in Sweden, is considerable, but there is no corresponding data in England, on which to form a comparison; An Account of the Children annually received into all the London Workhouses makes the Number about* 12,000, *of whom, about* 900 *are reported as Illegitimate, and* 200 *Foundlings; The Numbers reported* Drowned, *and to have died of* Drunkenness, *as well, as the* Murders, Suicides, and Executions, *specified above, are all indications unfavorable to the moral Character of Sweden: The legitimate object, and end of* STATISTICS, *is, to enable the relations and conditions of Society to be correctly understood, whereby its social and moral improvement may be progressively advanced. Unfortunately the object and end of* STATISTICS, *as yet, do not appear to be understood in Sweden, notwithstanding their long continued popularity.*

The Woollen Manufacture is principally carried on at Norrköping and Stockholm the proportion of Value manufactured in 1824

at Norrköping was	1,073,016
at Stockholm	608,630
at Nyköping	77,928
at Alingsås	19,444

In addition to the Wove Fabrics represented in the annexed list upwards of 13,000,000 Ells of Cotton, Linen, and Worsted Stuffs of Domestic manufacture, are also represented to have been made in the undermentioned Provinces in 1824 Viz.

in Elfsborg	1,351,567
Skaraborg	1,270,620
Gefleborg	1,262,895
Vesternorrland	1,073,375
Linköpings	902,717
Calmar	834,136
Kronoberg	771,910
Jönköping	741,220
Örebro	658,550
Nykopings	626,621
Westerås	547,148
Götheborg	521,608
Carlstad	453,054
Halland	430,100
Norrbotten	385,436
Westerbotten	238,134
Stockholm	321,500
Total Ells	13,463,567

The Silk Manufacture is confined exclusively to Stockholm. the Cotton Spinning is principally carried on at Elfsborg, Skaraborg, & Stockholm, and the Calico Printing in the vicinity of Götheborg, and Stockholm

**The Value of Mechanism for Manufacturing purposes in 1823 amounted to 157,576 Rix Dollars, the falling off in 1823 was owing to the breaking up of the principal Mechanical establishment of the Kingdom in that Year*

The Export of IRON during the 10 Years 1816 - 1826, averaged 376,761 Skeppund ℔ Annum, in the proportion of 239,949 Skep. from Stockholm
96,768 " " *Götheborg*
40,444 " " *all other Ports*

The Woollen Manufactures in 1824 consisted of
146,707 *Ells of Fine Cloth*
129,549 *do. Middling*
197,737 *do. Coarse*
19,667 *do. Flannel*
and Sundry Stuffs

The Total Value of the corresponding account of Manufactures for 1823 Amounted to 7,572,145 Rix Dollars

The following Statement shews the Number of *BLAST FURNACES*, and of *Iron Works*, and of *Forges* for the Manufacture of *Bar, and other IRON*, in Sweden in 1818, and 1821, and the annexed Statement shews the quantity, and annual Value of each Mineral Product. For the proportion of Value produced in different parts of the Kingdom, see the Statement of the Geographical Position of the several Provinces. The COAL, is exclusively produced in Malmö, and more than half the quantity raised, is stated to be consumed on the spot. The COBALT, is principally produced in Orebro, and a portion in Calmar, and Nykpöings; ALUM. in Linköping, Mariæstad, Orebro, and Christianstad; BRASS, almost exclusively in Westerås; SULPHUR, in Orebro, and Falun; COPPER, chiefly in Falun, considerable in Linköping, and partially in Westerås, Orebro and Nyköping; SILVER and LEAD, principally in Weseras, and partially with GOLD in Falun

		Excess of Export over Import		1,191,608
				12,595,171

*** *In addition to the* 1,191,708 *Rix Dollars, Excess of Value Exported, over and above the Value Imported, which the above account exhibits; The Imports will be found to include* 1,078,788 *Rix-Dollars of Value in Fish, which may be regarded as the produce of Swedish labor, rather than a Foreign Production, for which any other Product has been given, and further,* Salt *will be found Valued at* 553,812 *Rix-Dollars, whilst the quantity is stated at less than equal to* 25,000 *English Tons; and consequently, supposing it to have been Imported into Sweden, in Swedish Ships its Value is greatly over rated, and occasions a still further disparity between the Value of the Exports and Imports. —see Statement* Balance of Trade

STATEMENT showing the *Geographical Position* of each of the COLONIES belonging to the BRITISH EMPIRE in 1833, with the date of Settlement*, Capitulation†, or Cession‡ of each; the Population of each in 1829; the Tonnage of Shipping, cleared outwards to, and entered inwards from; and the value of the Exports to, and Imports from each, in the year 1830.

The diminution in the Slave Population of the British West Indies, when compared with the increase in the Slave States of North America is deserving of consideration; in addition to the number of Slaves in the West Indies; there are further 55,504 at the Cape of Good Hope; 20,464 at Ceylon; and 76,774 at the Mauritius, making a Total of 829,665; the Population of Van Diemans Land includes 8,484 Convicts; and that of New South Wales 15,668; both Totals are exclusive of Aborijines,—Vide Par. Pa., No. 260, Session 1831,—for the Imports and Exports, see No. 690, Session 1832: The excess of Export to Canada, Gibraltar, Malta, the Cape of Good Hope, Van Diemans Land, and New South Wales, is equalized in Mercantile account by the Bills drawn by the Agents of the Government at the respective places, and that to the Foreign West Indies becomes involved in the general account with Continental Europe.

*** *The Shipping entered inwards from New Brunswick appears greatly to have exceeded that cleared outwards, the difference probably arises from New Vessels built in that Province; to Newfoundland the Tonnage cleared outwards, greatly exceeds the Tonnage from; Gibraltar exhibits a still greater disproportion; several of the Vessels cleared for Newfoundland proceed direct from thence with Fish to Spain and Portugal, while several of those which clear outwards for Gibraltar, seek homeward Freights from those Countries, and the general Statement of Shipping cleared outwards and entered inwards to and from all Countries will shew that the Tonnage entered inwards from Spain and Portugal exceeds the Tonnage cleared outwards thereto in a similar proportion to the excess outwards to Newfoundland and Gibraltar. In like manner the Tonnage cleared outwards to Van Diemans Land and New South Wales, and to the Foreign West Indies greatly exceeds the Tonnage from thence, most of the Vessels clearing out for the former with Convicts and Settlers proceed to the Mauritius and India for homeward Freight; the Tonnage inwards from which will be seen to exhibit a corresponding excess, many of those cleared outwards for the Foreign West Indies proceed direct to European Continental Ports with their return Cargoes.*

STATEMENT shewing the Population, (distinguishing the proportion in Towns, from the proportion in the Villages,) in each of the 19 Provinces of the Kingdom of the *NETHERLANDS,* (as constituted in 1814) at each of the two Periods 1816 and 1825, the Provinces arranged in Order of their Total Population in 1816, with Number of Reference to their Geographical Position as exhibited on the preceding Page; shewing also the Total Number of *Marriages, Divorces, Births, & Deaths;* the increase ⅌ Cent.; and the Total increcase; the Total excess of Births over Deaths, and the Ratio of Births to every 100 Marriages, and of Deaths to every 100 Births, in the 10 Years 1815 – 24.

*** These Statements relating to the Population of the *NETHERLANDS,* have been compiled from an Official Work of 31 Sheets, printed at the Hague in 1827, in pursuance of an order of His Majesty's the King of the Netherlands, bearing date the 3rd. of July of the preceding Year; the first 10 Sheets purport to shew all the changes in the Numbers of the Population in each Province of the Kingdom, in each of the 10 Years 1815 – 24; the 11th. Sheet is a Summary of the 10 preceding Sheets; the 19 following Sheets purport to shew the change in each of the 19 Provinces separately, in each of the aforesaid 10 Years 1815 – 24; and the 31st. and last Sheet is a Summary of the 19 preceding ones; in this Work the proportion of the Births and Deaths to the Total Population distinguishing the Number in Towns, from the Number in the Villages, *(communes rurales)* is worked out to 2 places of Decimals, and the proportion in the Births and Deaths which the Males bore to the Females is worked out to 4 places of Decimals with various other minutiæ of detail; with such a display of circumstantiality it was deemed fair to suppose that some additional light on the subject of the causes which influence the changes and progress of Population might have been derived; but on investigation it proved, that the 31 Tables contained a greater display of calculation and detail, than Philosophy; for, it will be seen that whilst in *Liege* (see No. 17, in the Order of Geographical Position) the Births in the 10 Years 1815–24, exceeded the Deaths by 30,945, and only 986 in the 10 Years represented to have emigrated out of the province, the Population in 1825, is stated to be 27,084, less than in 1815; on the other hand, the increase represented to have taken place in *Luxembourg* is as irreconcileable, as is the decrease in *Liege:* and although the results of the other Provinces indicate a probable approximation to accuracy; they contain several trifling errors, the less excusable on account of the display of minutiæ of calculation, whilst a suspicion is thrown over the whole by the results of the two Provinces here specifically adverted to.

The diminution of Births, and great increase of Mortality in 1817, *deserve notice; the result was probably occasioned by the extreme uncongeniality of the Season of* 1816. *In England and Wales in* 1817, *there was a diminution of Burials, without any diminution of Births; a great increase of Mortality however ensued: in* 1818 – 19 *the Number of* Divorces, *in North and South Holland, bespeaks peculiarities in the domestic habits of the People of those Provinces.*

PROVINCES, arranged in order of their TOTAL POPULATION.	*POPULATION, as enumerated in* 1816, *and* 1825.			*Number of Marriages*	*Divorces*	*Number of Births and Deaths, in the* 10 *Years* 1815-24.					*Increase ⅌ Cent. in the* 10 *Years.*	*Ratio of Births to every* 100 *Marriages.*

The STATEMENT below shews the estimated proportion of Superficies in Hectares, appropriated to various kinds of Culture, in the Kingdom of the *NETHERLANDS;* and the Annual Value of the produce thereof in *francs* between the Years 1820–30.

	Hectares	*Rate*		*Value in francs*
Wheat	350,000	22	*francs ⅌ Hectolitre*	154,000,000
Rye	700,000	12		168,000,000
Barley	280,000	10		84,000,000
Oats	300,000	7		84,000,000
Pulse	110,000	22		48,400,000
Buck Wheat	200,000	8		32,000,000
Potatoes	130,000	2		41,600,000
Hemp & Flax	210,000	600		126,000,000
Kitchen Gardens	92,000	"	*francs ⅌ Hectare*	55,200,000
Oleaginous Plants	60,000	20		24,000,000
Orchards	54,000	60		3,240,000
Madder	30,000	700		21,000,000
Hops	30,000	800		24,000,000
Vines	20,000	10		200,000
Tobacco	10,000	1,000		10,000,000
Woods	900,000	350		15,750,000
Marshes & Lakes	116,000	4		464,000
Meadows	1,000,000	*as ⅌ annexed Statement.*		306,000,000
Pasture	400,000			
Parks & Plea. Grounds	300,000			
Covered with Buildings	25,700			
TOTAL	5,317,700			1,978,854,000

The following STATEMENT shews the estimated Number, Annual Consumption, & Money Value in *francs* of Horned Cattle, Sheep, Pigs, Poultry, Horses, &c. &c. in the Kingdom of the *NETHERLANDS*, between the Years 1820–30.

	Number in Stock	*Annual Consumption*	*Rate*	*Value in francs*
Oxen & Cows	1,500,000	200,000	200	40,000,000
		Milk	—	19,000,000
Heifers & Calves	590,000	260,000	15	3,900,000
Sheep	1,600,000	500,000	10	5,000,000
	Wool, Kilogram.	2,400,000	2	4,800,000
Pigs	600,000	580,000	50	29,000,000
Poultry	8,000,000	2,000,000	1½	3,000,000
	Eggs	180,000,000	—	4,500,000
Horses	390,000	150,000	300	45,000,000
Colts under 3 Yrs.	95,000	40,000 Skins	6	240,000
Dry Forage	quintals	30,000,000	—	150,000,000
Bees	—	—	—	2,000,000
TOTAL Value				306,000,000

The annexed is a Statement of the Income from Taxes, and Expenditure of the Government of the NETHERLANDS, in *florins*, in each of the Eleven Years 1816—1826; according to these amounts the Expenditure has exceeded the Income by an average of about ten Millions of florins annually; equalized probably by Loans, or issues of some Government Security similar to the English Exchequer Bill.

Years	*Income*	*Expenditure*
1816	140,023,658	——
17	83,416,654	111,877,561
18	83,075,521	94,825,409
19	80,933,971	92,561,408
1820	80,472,754	85,050,664
1	89,311,721	91,454,256
2	85,272,108	91,423,606
3	96,150,985	93,922,428
4	81,309,677	101,878,147
5	95,954,765	106,177,979
6	104,542,413	112,116,749

☞ The above STATEMENTS relating to the Productions and Revenue of the *NETHERLANDS*, have been compiled from two or three vague works on the subject, published in France; which works also represent the Manufactured Productions of the same Kingdom, to amount annually to 675,000,000 of francs, which amount, includes 10,000,000 francs for Cheese; whilst Butter and Coals are omitted in both estimates: although these accounts seem entitled to but little consideration for accuracy, they will suffice to shew the various Items of Resource.

AN ACCOUNT shewing the Superficies in German Square Miles; the Population; and amount of Tax on Traders; and also the Number of Sheep, Horses, and Horned Cattle, in each of the 9 Departments of the *PRUSSIAN MONARCHY*, in 1816 and 1828. *** *The part of the account relating to Horses, and Horned Cattle, was taken from Mr. Jacobs 2nd. Report on Agriculture and Corn of Europe. Vide Parliamentary Paper, No.* 258, *Session* 1828. ☞ *The Totals of Horned Cattle in* 1825, *do not agree with the details. The Total of Bulls being* 50, *and Cows* 10,456 *too many, and the Young Cattle* 4,050 *too few.*

. The annexed Statement shows the Charge of 1829 more in detail: the 5th Item appears overrated: the Total Income in 1821, includes £4,483 received in lieu of Statute Labour, & £59,945 so received in 1829: & £100,000 as the supposed Value of Statute Labour performed, not otherwaysbrought into Account: the remainder is derived wholly from Tolls. The Balance due to Trusts, consists of Balances in Treasurers Hands, and Tolls and Parish Composition due, but unpaid: and in 1829, £74,105 of Arrears of Tolls and Parish Composition of previous Years. The Total Charge annexed, differs from the column above, by the amount of Items 2 and 10. The proportion of Item 11 for Acts of Parliament, may in some degree be inferred by the Amount paid to the Officers of the House of Commons for Fees thereon,—see col. 34, page 102 of the Finance part of these Papers: see also Note to page 104 of the same class of Papers, for further Sums expended on Account of Roads. The account from Scotland in 1821, includes only 23 out of the 33 Counties, there being no notice taken of Kinross & Fife, Argyle & Bute, and the 6 Counties North of the Caledonian Canal and Murray Frith: upon the Evidence and Appendix from which the above Statement has been compiled, the Lords Committee reported, that, "One of the greatest evils in the present Road System is the Number of Trusts, as well as their limited Range and Extent. The Committee would therefore recommend Consolidation, &c &c."

1 Interest on Debt (Charged)		£236,620
2 do., due on Debt, the Interest not brought into Account		129,583
3 Paid for Manual Labour	£393,173	
4 (Charge for Team Labour, &c. £578,237)		
5 Proportion supposed Manual	192,746	495,919
6 The Residue, including some Improvements		383,402
7 Land Purchased, &c.		56,264
8 Repairs, &c. of Toll Houses		63,968
9 Salaries, &c.		196,925
10 Supposed Value of Statute Labour, not brought into Account		100,000
11 Sundry Payments, including Acts of Parliament, & Improvements		213,757
Total Charge in 1829		£1,967,6[illegible]

STATEMENT, showing in 13 grades of Ages, the Free White; and in 6 grades, the Slave Population, of each of the 28 Districts and Territories of the United States of NORTH AMERICA in 1830, distinguishing in each grade of Age the Proportion of Males, and Females; showing also the Total Number of Free People of Colour, and of Aliens; the Number Deaf & Dumb, and Blind, in each State.

*** *The same ratio of increase continuing that has taken place since 1800, will give by the close of the present century a total of about 9,000,000 of Whites, a population of Blacks.*

The progressive increase of Population in the United States of North America, may be regarded as one of the remarkable features in the events of the last 40 Years. During each of the three Ten Yearly Periods from 1800 to 1830, the rate of increase has been about 35 ℣ Cent, or 111 in the aggregate of the 30 Years: while, in Great Britain the increase in each Period has been only about 15½ ℣ Cent, or 51 in the aggregate of the 30 Years. The Clerical and Typographical accuracy of the compilation of the American Official Returns is creditable to the parties entrusted with their arrangement and execution; had any errors or Typographical blunders existed, the working of the above results would have discovered them, but none were found to exist. It is as honourable to the American people to have produced so accurate a display of their Numbers, as their amount and increase are interesting to the Philosophical enquirers of all countries; but before they are entitled to unqualified commendation for their regard for this interesting branch of social enquiry, they must exhibit an equally accurate Account of the No. of Births, and a corresponding display of Deaths in each Class of Ages. On comparing the proportional results of the Totals of the United States, with the Total results of the different Sections of the United Kingdom, the Numbers above 30 Years of Age in the United States, show a considerable disproportion to the Numbers within that Age: two opposite causes, or both conjointly, may contribute to such disproportion—a much shorter average duration of Life, or an excess of Births; it is probable that both materially contribute to the disproportion in the United States: but until an equally accurate Account of the Births and Deaths are given, much must be left to conjecture: the migratory tendency, also, of the Inhabitants of the United States, greatly augmenta the disproportions in the different States: to render the greatest interest to such Accounts, the change of residence should be given as is done in the Netherlands, see page 82. See also pages 71, & 91, for comparison of the results with Sweden, and the several parts of the United Kingdom.

London, Sept. 1833 J. Marshall.

☞ *The Rental of Houses assessed to the House Tax in 1829, will be seen to be considerably below the amount of Rental in 1811, but it will be remembered that in 1823, all Houses of less than £10 Yearly Value were exempted from the House Tax; while previously, a considerable Number below that Value were subject thereto; Scotland however appears not to contribute a fair quota of direct Taxes; while the Land Rental is one sixth of that of England, the Assessed Taxes are only one fifteenth, and the contribution of all Scotland, is less, than that of the City of Westminster.*

Number of Houses and Families, in 1801 and 1811; Rental; Properties; and Total Population, at each of Six Periods 1755–1831.

Number of Houses Assessed to House and Window Duty; Rental at which Assessed: and Amount of Land and Assessed Taxes, in each County.

COUNTIES, arranged in ALPHABETICAL ORDER, with No. of reference to Geographical Position.	Number of HOUSES, Assessed to House Duty in 1829, at Rentals of from (Vide Parliamentary Paper No. 160, Session 1831.) £10 to £15.	£16 to £20.	£21 to £30.	£31 to £40.	£41 to £50.	£51 & abv.	TOTAL.	Number of Farm Houses exempt.	Number of Inhabited Houses in 1821.	Rental of those Assessed at from £10 to £50. (£)	£50 and above. (£)	Number of HOUSES assessed to Window Duty in 1829, having Windows from 8 to 10	11 to 15.	16 to 20.	21 to 25.	26 & above.	TOTAL	Amount of Duty on the same. (£)	Gross Amount of the assessed Taxes in 1829 (Vide Par. Pa. No. 269, Session 1831.) Land (£)	Assessed (£)

COMPARATIVE VIEW of the Total Number of HOUSES, *Building, Uninhabited, and Inhabited;* and of FAMILIES and their *Occupations*, under each of three general heads in each County of SCOTLAND and WALES; and the Total of each in all GREAT BRITAIN, and the Isles of Guernsey, Jersey, and Man, in 1821 & 1831; distinguishing in Scotland the proportion of each, in the Six principal Cities and Burghs: Page 88 shows the Number of Houses and Families in 1801 and 1811; and page 13 exhibits a comparison of the Occupations in 1811 and 1821, and the Note thereto directs attention to the stationary number of Agriculturists, while the Statement below shows a diminution in 1831 compared with 1821, and an undue increase in the third Column; the Note however to the Display of the Occupations in the English Counties at pages 10-11, will explain in part the cause of that seeming disproportion.

COUNTIES arranged in Alphabetical Order.	Number of HOUSES. Building. 1821.	Building. 1831.	Uninhabited. 1821.	Uninhabited. 1831.	Inhabited. 1821.	Inhabited. 1831.	TOTAL Number of FAMILIES. 1821. Alphabetical List of **500** *Miscellaneous Occupations, carried on in various parts of Great Britain, showing the number of Male Persons* **21** *years of age and upwards, employed in each Occupation, in each Place or County,*

Air Pump Maker 1
Agricultural Machine Maker, *Roxb.* .. 10
Anchor-smiths: *Midd.* .. 5; *Surrey* .. 1; *Bristol* .. 1
Animal Preserver 1
Armourers: *Midd.* 1; *Surrey* 1; *Edinb.* 2
Army Accoutrement Makers 16
Artificial Flower Makers: *Midd.* .. 3; *Surrey* 3; *Yk. City* 1; *Newcastle* 1
Assayers: *Midd.* .. 2; *Cornwall* 10
Awl-makers: *Middx.* 2; *Edinb.* 3

B

Back-makers 13
Bacon Dealers: *Mild.* .... 3; *York, E. R.* 2; *do. City* 4; *do., N. R.* 1; *Dumfries* 1; *Glasgow* 3
Bacon Driers: *Midd.* 3; *Surrey* 3
Bag-makers: *Dorset* .. 3; *Worcester* 3
Ball-makers: *Kent* .... 19; *Midd.* .. 3; *Surrey* .. 1
Barometer-makers: *Midd.* 3; *Essex* 1
Bat-makers: *Midd.* .. 1; *Norwich* 1
Bead-makers 29
Beam-do., *Fife* .. 2
Beaver cutter 1
Bedstead-makers: *Midd.* 37; *Surrey* 20
Bee-hive makers: *Yk. N. R.* 2; *Denbigh* 3; *Glamorg.* 1; *Aberdeen* 2
Bell Founders: *Devon* 3; *Glo. City* 3; *Linc.* 1; *Norf.* 2
Bell Hangers: *Birmg.* 6; *Worc.* 2; *Montg.* 1; *Dumfries* 1; *Dundee* 3; *Edinb.* 5
Bellows-makers: *Midd.* .. 12; *Bristol* 6; *Cutesbal* 3; *Surrey* 3; *Worc.* 1
Belt-makers: *Midd.* .. 1; *Surrey* .. 2
Billiard Table Keeper *Oxford City* 4
do. Maker.... 1
Birdcage-makers.. 50
Bird-stuffers, dealers 7
Bleaching-makers: *Middlesex* .. 17; *Notts.* .... 7; *Norfolk* .... 2; *Lancaster* .... 2; *Portsmouth* .. 8; *Wilts.* .... 1; *York, W. R.* 2; *Bath* .... 1; *Oxford* .... 1; *Dorset* .... 1; *Devon* .... 1; *Lancashire* .. 135; *Cumberland* .. 11; *Derby* .... 20; *Devon* .... 7; *Bristol* .... 8; *Middlesex* .. 11; *Northumberland* 3; *Notts.* .... 13; *Salop* .... 8; *Stafford* .... 2; *Surrey* .... 25; *Westmoreland* 3
Blockers: *York* West 30; East .. 5; City .. 3; North 31
Blind-makers (Window): *Mid.* 56; *Sur.* 12
Block-makers (Calico Printing,) *Lanc.* 196
Blue-makers (Indigo) 5

		Bistree, &c.	104
		Holywell	260
		Remainder of County	36

The Numbers returned under the head of Manufactures in the other Counties of Wales, are almost exclusively Weavers for Domestic consumption.

SCOTLAND.

In Scotland the predominating Manufacture is Cottons in the counties of Lanark, Renfrew, Ayr, Dumbarton, and Perth; in Fife and Forfar Linens predominate; in Aberdeen Linen and Cotton; in Stirling, Woollens and Cottons; in Edinburgh, Fine Shawls and various fancy articles, and the Silk Manufacture partially prevails in Perth and a few other places. In the remaining counties of Scotland the numbers returned under the head of Manufactures, like those in Wales, are chiefly Weavers for local Domestic consumption: in Glasgow, Greenock, and Leith, the usual Manufacture of Cordage, Chemicals, and other articles incidental to large Sea Ports, prevail to some extent, and the following is a list of articles peculiar to the places specified, viz.— *(see following page)*

STATEMENT showing the Proportion of the MALE POPULATION in each County of SCOTLAND and WALES, 20 Years of age, and upwards, Returned under the Population Act of 11 Geo. IV. cap. 30, employed or engaged in AGRICULTURE, distinguishing the proportion employed as LABOURERS from the proportion engaged as OCCUPIERS; showing also, the proportion employed or engaged under each of Six general heads of Occupation or Service, as well as the Total Population, distinguishing MALES from FEMALES; and also, the Number of MALE SERVANTS under 20 Years of age, and FEMALE SERVANTS of all ages in each County; Col. No. 5, exhibits the Total of those displayed in detail on the preceding folding sheets; Col. No. 6, comprises Miners, Fishermen, and Labourers, employed as Porters, Warhousemen, or otherways, by the employers of Cols. No. 5, 7, and 8,—see Note preceding page relating to the Col. of Manufacturers; No. 8, comprises the Clergy, Legal, and Medical Practitioners, Artists, and Teachers; No. 9, may be defined Passive Agents, Consumers without either producing or rendering any useful Service, and probably include a greater Number, not being heads of Families than any other Class.

For details under each of the 9 heads in each County of England,—see pages 10-11, a remarkable feature in the Population of Scotland, is the preponderance of Females over Males, a consequence, probably, of the greater Emigration of Males from Scotland, than from any other part of the Kingdom.

	COUNTIES, arranged in Geographical Order, from South to North.	Employed in AGRICULTURE. Occupiers employing Labourers.	Cottagers not employing Labourers.	Labourers	TOTAL.	Retailers and Handicraftsmen, as ☞ preceding Display.	Labourers other than in Agriculture, including Miners, Quarry and Fishermen &c.	MANUFACTURERS, as ☞ pages 93—4.	Merchants, Bankers, & Professional Men.	Proprietors, Annuitants, Mortgagees, and Dependants.	Servants.	Total Male Population 20 Years of Age and upwards.	Male Servants under 20.	TOTAL Population. Males.	TOTAL Population. Females.	Female Servants.

AN ACCOUNT

OF THE NUMBER OF

Marriages, and of Baptisms and Burials,

DISTINGUISHING THE PROPORTION OF MALES AND FEMALES,

BAPTIZED AND BURIED, AND UNENTERED AS WELL AS REGISTERED,

IN EACH COUNTY OF ENGLAND AND WALES, IN THE TEN YEARS,

1821—1830,

AND OF THE

Number of Illegitimate Children of each Sex,

BORN IN EACH COUNTY, IN THE LATTER YEAR;

ALSO

AN ACCOUNT

COMPILED FROM THE RETURNS MADE TO PARLIAMENT, UNDER THE ACT OF XI. GEORGE IV. C. 30., FROM THE 11,301 PAROCHIAL REGISTERS OF ENGLAND AND WALES,

OF THE TOTAL NUMBER OF EACH SEX,

(1,996,195 Males,
1,942,301 Females,)

THAT DIED WITHIN EACH OF THIRTEEN GRADES OF AGES, IN EACH COUNTY OF ENGLAND AND WALES, IN THE METROPOLIS, AND ELEVEN OTHER OF THE PRINCIPAL CITIES AND TOWNS, AND IN THE ISLE OF ELY, IN THE EIGHTEEN YEARS,

1813—1830,

SHOWING FURTHER, THE PROPORTION TO EVERY **10,000** OF EACH SEX THAT DIED DURING THE SAME PERIOD WITHIN EACH OF THE THIRTEEN GRADES OF AGES, IN EACH COUNTY, CITY, TOWN, &c., AND ALSO THE PROPORTION TO EVERY **10,000** OF EACH SEX, IN EACH GRADE OF AGE, LIVING IN EACH COUNTY, IN 1821, &c., &c., &c.

LONDON
PRINTED BY J. HADDON, CASTLE STREET,
FINSBURY SQUARE.

STATEMENT showing the POPULATION of each County of ENGLAND and WALES in 1821, and the Total Number of *Marriages, Baptisms, and Burials*, both registered and un-entered in each of the same, in the 10 Years 1821—30; distinguishing the proportion of Males and Females in each County; the Counties arranged in order of their Total Population in 1821, whereby the disproportion of Marriages, Baptisms, and Burials, is the more readily discernable; For a similar display for the 20 Years 1801—20, see pages 18–21.

COUNTIES arranged in order of their Total Population in 1821.	*POPULATION, as enumerated in* 1821. *In the Counties noted with an * the Males exceed the Females.*			*Marriages, Baptisms, and Burials, in the* 10 *Years* 1821—1830.								*Number of Illegitimate Births, in* 1830.

TABLE showing the Total of the MALE Population of each County of ENGLAND and WALES, of the METROPOLIS, and of Eleven of the most populous CITIES and TOWNS, and of the ISLE OF ELY, as enumerated at each of the two periods 1811 and 1831; showing also the salubrity or physical condition of each, as indicated by the total number of REGISTERED BURIALS in each, during the 18 Years 1813-30, and the proportion in each of 15 grades of ages, the Counties being arranged in order of their Total Population, whereby the inequality of Deaths in each grade of age is more immediately discernable than if the Counties had been arranged in alphabetical order. This, and the Statements on the two preceding, and five following pages are the result of the second part of the enquiry under the Population Act of 1831, [XI of Geo. IV. ca. 30,] the object of which second part, was, that the account of Births and Deaths might serve as a corollary or check upon the enumeration returns, the first of which in this Country took place in 1801, and has been continued at intervals of 10 Years since that time. Four ten yearly returns having now been made, the basis is laid for a more perfect developement of the effect of climate and condition on human existence than any age or Country has yet produced. The Parish Register Act having been amended by the 52 Geo. III. ca. 146, occasions the return of Burials to commence from that date [1813.] The imperfection of Parochial Registration, consequent on Sectarian pertinacity, or religious scrupulosity, and the absence of account of Immigration into, and Emigration from the United Kingdom, has hitherto prevented that exactitude of conclusion, in regard to the actual increase of Population, which in a Country making such pretensions to scientific acquirement as Great Britain does, it would have been interesting to have been able to have arrived at. A proposed Act in the present Session [1834] to make the Registration of Marriages, Births, and Deaths, a civil or social, instead of a religious procedure, will be another important step in the progress of advancement in this interesting branch of social existence; but to render it as perfect as it is desireable it should be, an account must be had of the Immigration into England and Wales, from Scotland and Ireland; as well as from all other parts; and as far as practicable, of the Emigration from each part of the United Kingdom; the movement, also or change of domicile, as it is termed by the Dutch, see page 82, and as exhibited on the preceding, as well as at pages 19 and 21 should be given.

COUNTIES, *arranged in order of their* TOTAL POPULATION, *in* 1811.	Total MALE Population, as enumerated in 1811.	1831.	Total No. that died in the 18 Years 1813—30.	Proportion that died at each of the 15 undermentioned grades of Ages. Under 1.	Of 1.	Total under 5.	5 to 9.	10 to 14.	15 to 19.	20 to 29.	30 to 39.	40 to 49.	50 to 59.	60 to 69.	70 to 79.	80 to 89.	90 to 99.	100 & upwards.

The STATEMENT below exhibits the Total of the FEMALE Population in ENGLAND and WALES, &c. &c., and the Total Number of *Registered Burials* thereof in corresponding time and order to that of the Males on the preceding page. On referring to page 98 it will be seen that the births of Males greatly exceed those of Females, while by the Statement below it appears that the Mortality of Males in infancy, and up to 10 Years of age, exceeds that of the Females in a greater proportion than the excess of Births; from 10 to 15 Years of age, the Mortality of the two sexes appear equal; while from 15 to 40 the Mortality of Females greatly exceeds that of the Males; from 40 to 50 it again appears nearly equal; and from 50 to 70 preponderates among the Males; after 70 the period of longevity may be considered to have commenced, and to preponderate greatly in favor of the Female; hence, notwithstanding the excess of Males born, the greater Mortality in infancy, and the shorter duration of Life, together with the greater emigration of Males, a preponderance of Females always appears on enumeration; one or two Counties which will be noticed in another place present an exception to this general rule. The two following pages exhibit the proportion in every 10,000 of each grade of age in each of the Counties and Towns exhibited on this and the preceding page, by which the relative mortality in each County and Town is more readily discernable than by inspection of the Total Numbers. According to the proportional results, the North Riding of York, and the County of Hereford, exhibit the highest indications of longevity, and inconsiderable mortality in infancy; but as regards the North Riding of York it deserves consideration how far the results are affected by its large emigration; it is shewn at page 99 (see No. 32 of that page) that admittiug the enumeration returns to be accurate, 10,095 Males, and 7,204 Females must have left that district, and augmented the Numbers in some other Counties in equal proportions, and at page 21 it is shewn in like manner, that 4,616 Males, and 3,865 Females, left the North Riding in the 10 Years 1801—10, which numbers have tended to increase the number of deaths in other Counties on one side, while they have tended to diminution in the North Riding. It is further shown at page 99 that in the 10 Years 1821—1830, the Metropolitan, Manufacturing, and Mining, Counties have received an accession of 682,589 Inhabitants beyond the excess of Births over Deaths. (See following page.)

COUNTIES *arranged in order of their* TOTAL POPULATION, *in* 1811.	Total FEMALE Population as enumerated in 1841.	1831.	Total No that died in the 18 Years 1813—30.	Proportion that died at each of the 15 undermentioned grades of Ages. Under 1.	Of 1.	Total under 5.	5 to 9.	10 to 14.	15 to 19.	20 to 29.	30 to 39.	40 to 49.	50 to 59.	60 to 69.	70 to 79.	80 to 89.	90 to 99.	100 & above.

STATEMENT of the Total Number of DEATHS, distinguishing *Males* from *Females*, in each County of ENGLAND and WALES, in the METROPOLIS, in each of eleven of the principal Cities and Towns, and in the Isle of Ely, in the 18 Years 1813—1830, and the proportion thereof in every 10,000 of each sex, at each of 13 grades of ages; also a Statement of the total numbers that died during the same 18 Years, distinguishing Males from Females, at each year of their respective ages; compiled and deduced from the returns of the number of Burials made to Parliament under the Act of 11 Geo. IV., cap. 30, from the 11,301 Parochial Registers kept within England and Wales in 1831, the returns being all complete. At the present time, when the principle of Insurance of Lives is producing increasing excitement, and when the result of its practice is about to develope itself, the interest and importance of Statements like these cannot be too highly appreciated; these notwithstanding some discrepancies are probably the most complete and important exhibitions of the kind that any Age or Country have as yet produced. In 1821 it was endeavoured to arrive at just conclusions in regard to the relative effect of climate and circumstances on, and the expectancy of human life, in the different parts of the Kingdom by obtaining the ages of the living; although that investigation led to results both curious and interesting, [see pages] they are very inconclusive; while in the present case, although the returns of the ages are in many instances questionable, as a whole, they may be regarded as sufficiently approximative to accuracy for all ordinary, or practically useful purposes. It is observed by MR. RICKMAN in his preface to the Official Returns, that "It was impossible to arrange the Table of the 3,938,496 Persons buried in England and Wales, without remarking the excess of Mortality which falls upon "the Decennary Years, especially on 60 and 70, where the Burials are recorded to nearly double the amount as compared to the preceding, and to the succeeding "Year. Hence the tendency to speak in round numbers may be estimated with considerable exactness; one person in 4 or 5 who dies at 59 and 61, and at 69 and 71 "Years of age being thereby transferred to 60 and 70."

COUNTIES, *arranged in reference to their apparent effect on* HUMAN LIFE.	Total Number that died in the 18 Years, 1813—1830. Male.	Female.	Proportion of MALES, in every 10,000, that died at each of the 13 undermentioned grades of ages. under 5.	5 to 9.	10 to 14.	15 to 19.	20 to 29.	30 to 39.	40 to 49.	50 to 59.	60 to 69.	70 to 79.	80 to 89.	90 to 99.	100 & above.

The STATEMENT below exhibits the proportion in every 10,000. FEMALES that died, in each County of ENGLAND and WALES, in each of 13 grades of ages, in the 18 Years 1813—1830, in corresponding order with the Males as exhibited on the preceding page. *** In reference to the seeming disproportion of ages in the several Counties, see note at head of page 101, where it is shown that the Metropolitan, Mining, and Manufacturing Counties, received in the 10 Years, 1821—1830, no less than 682,589 Inhabitants, beyond the excess of Births over Deaths, while the Agricultural Counties during the same period gave out 130,965, leaving upwards of 550,000 to be accounted for, as having Immigrated into the Metropolitan, &c. Counties of England and Wales from Ireland, Scotland, and Foreign parts; in addition to these causes for disproportion in the ages of those dying in the different Counties, the results are further affected by the emigration to distant parts during the same period of about 350,000 persons of mature age; to enable a just comparison to be drawn of the relative effect of locality and circumstances on human existence, all that are born in their respective districts should continue therein until they die, and an accurate account be kept of the Number and age of all who may immigrate thereinto. Page 17 exhibits the result of Mortality during the same 18 Years, in eleven other of the principal towns of England in comparison with the Counties of Essex and Rutland, and the Metropolis, and the following page exhibits the proportion living in every 10,000, in each grade of age, in each County of England and Wales, and in Scotland in 1821; from the whole of which it is deducible, that while the Manufacturing Districts exhibit the greatest tendency to increase of numbers by procreation, as well as by immigration, the Manufacturing operations are unfavorable to life; but the aggregate of Great Britain exhibits a high physical condition, whether viewed in comparison with its state at former periods, or in comparison with the physical results of other communities in any part of the World.—See pages 86-7 for the United States of North America.

STATEMENT showing the Total Number of MARRIAGES, BAPTISMS, and BURIALS, in all England and Wales, for the 10 Years 1821—1830, in continuation of the Statement at page 31, which Statement was carried up to the 18 Years 1813—1830, and which Statement will afford any corroborative evidence of the effect of circumstances as regards the Population; in that Statement the greatest extremes are represented by the signs + plus, and — minus; in the annexed Statement the Year 1822, which was a period of great commercial activity, consequent on the facility given by Foreign Loans to exportation, and also a year remarkable for the very low money price of the main articles of subsistence, exhibits relatively the fewest Marriages, but the greatest number of Baptisms, and the greatest excess thereof over Burials; 1826 exhibits the next greatest number of Baptisms, and excess thereof over Burials, without any Commercial, Political, or Social cause showing itself, while the memorable year 1826, shows relatively the greatest number of Burials of any year in the period.

YEARS.	Marriages.	Males.	Females.	TOTAL.	Males.	Females.	TOTAL.
1821	100,808	181,811	173,496	355,307	15,915	16,089	32,031

1830	107,719	191,200	187,860	382,060	18,621	18,952	37,573

The annexed Statement shows the Total Number of MARRIAGES, AETISMS, and BURIALS in the METROPOLIS, in each of the 10 Years 1821—1830, in continuation of the Statement at page 29. The excess of Baptisms over Burials in the Metropolis, in these 10 Years is not only very considerably less in proportion, than in the aggregate of all England and Wales, but likewise so in the Metropolis itself, in comparison with the preceding ten Years. Page 99 shows that Scotland is the large increase of Population in the Metropolis is occasioned by an influx from Ireland, and that Agricultural Counties of England and Wales, and of Scotland, are those which furnish the Metropolis with its Population; and it is shown in another place that this change of population in the Metropolis, and the proportional results, exhibited on this, the preceding, and following page, do not however materially aid the exact enquirer, in estimating the requisite allowances for such changes.

Proportion in every 10,000, of each sex, living in 1821, within each of Thirteen grades of ages, in each County.

MALES.—Proportion living in every 10,000, within each of the 13 undermentioned grades of ages.—FEMALES.

ALPHABETICAL INDEX,

To the Geographical and Statistical Display of the Locality, Relation, Superficies, Population, and Revenues, of each County, Section, District, and Colony of the British Dominions, and of the several Provinces and Districts of Russia, Prussia, France, the Netherlands, the Peninsula of Spain and Portugal, and the United States of North America.

Page

A.

Aborigines, number of, in the United States of North America 51
Africa, Gambia, Sierra Leone, Cape Coast Castle, and Fernando Po, Geographical Position, Population of, and Commerce with 78
Ages, Ratio of, of the Population of Ireland in 1821 15
Do. of the Population of Sweden in 1820, in each of 23 gradations of ages, and the ratio thereof contrasted with England 71
Do. of the Agricultural Population, in three classes 72
Do. of Population in each province of Sweden 75
Do. of the Population of each county of Great Britain, at different periods.. 100-4
Do. of 3,938,496 Persons that died in England and Wales in the years 1813-30 102
Do. See also Life, Death, Mortality, and page 17
Agriculture, Families returned as employed in, in each county of England, at each of the three periods, 1811, 1821, and 1831 10
Do. number of Males, twenty years of age, and upwards, employed in, in each county in 1831, distinguishing labourers from employers ..... 10 & 91
Do. total number in each county, contrasted with Manufacturers 11
Do. the like display of, of each county of Wales and Scotland 96
Do. relative importance of, compared with other sources of employment and production 3
Agricultural Counties, England, Nos. 24—42 12
Do. Scotland, 13—26 13
Villages, population of, No. 25 3
Agricultural Districts of the county of Middlesex, Maintenance of Poor in, from 1776 to 1832 49
Population, amount of, in each province of Sweden, No. 73
Do. total of each class 68
Produce, in each province of do. 74
Do. in each Department of France 58, 59
